#### 2. Adjustment of liability component of convertible bonds

On 28 March 2014, the Company issued convertible bonds due 2019 in an aggregate principal amount of HK\$2,400,000,000. The Company would, at the option ("Put Option") of the bond holder, redeem all or some of the convertible bonds on 28 March 2017 at their principal amount together with interest accrued to such date but unpaid. The Put Option lapsed on 28 March 2017. The estimated date of payment in relation to the convertible bonds is revised from 28 March 2017 to 28 March 2019. Accordingly, the carrying amount of the liability component of the convertible bonds is adjusted from HK\$2,250,000,000 to HK\$2,047,896,000 on 28 March 2017 to reflect the revised estimated cash outflows that is recalculated by computing the present value of estimated future cash flows at its original effective interest rate of 6.786% per annum. The adjustment of the carrying value of the liability component of the convertible bonds amounting to HK\$202,104,000 is recognized in profit or loss for the period.

#### 3. Earnings per share - continued

*Note*: In the calculation of the diluted earnings per share for the three months ended 31 March 2017, the Company's outstanding convertible bonds are assumed to have been fully converted into ordinary shares and the profit for the period attributable to owners of the Company is adjusted to exclude the items comprising the adjustment of liability component of convertible bonds and the interest expense relating to the convertible bonds.

The computation of diluted earnings per share for the three months ended 31 December 2016 and 31 March 2016 did not assume the conversion of the Company's outstanding convertible bonds because the assumed conversion would result in an increase in earnings per share.

### **REVIEW**

The Group achieved strong financial results for the first quarter of 2017 and set many new records. Both Group bookings and billings reached new highs for the first quarter of a year. Group bookings surged 48.6% year-on-year and 29.2% quarter-to-quarter, respectively, to US\$608.4 million. Group billings amounted to US\$484.7 million representing growth of 31.4% and 6.8% against the same period last year and the preceding quarter, respectively. Book to bill ratio for the Group was 1.26 and backlog as of the end of the first quarter increased to US\$551.5 million, representing an increase of 30.2% from the end of last year. Group gross margin was at 39.9%, representing improvement of 686bps and 233bps over the same period last year and the preceding quarter, respectively. Group net profit surged 470.0% year-on-year and 92.9% quarter-on-quarter due to higher revenue, improved gross margin and a non-cash gain related to an adjustment of the liability component of convertible bonds ("CB") issued by the Group in March 2014. Excluding the non-cash gain related to the adjustment of the liability component of CB, the Group profit before taxation improved by 269.7% year-on-year.

Our strong performance was driven by the robust demand for Lead frames, CIS, LED, IC/Discrete, and SMT equipment. By application markets, the Mobility, Communication & IT and the Automotive markets were the two major contributors to the Group's strong billing and booking growth in the reporting quarter. The Group closed its first quarter on a high note with good results attained by all three business segments, namely, the Back-end Equipment, the Materials and the SMT Solutions Segments. In addition, all three business segments recorded the highest ever Q1 billings during this quarter. The bookings of these three business segments for Q1 2017 also witnessed a strong increase with year-on-year growth rates ranging from 34.6% to 63.3%. Both Back-end Equipment and SMT Solutions business segments achieved year-on-year improvement in segment results while it was flat for the Materials segment.

By geographical distribution, China, Europe, Korea, Malaysia and the Americas were the top five markets for ASMPT. The significant increase in sales to Korea was mainly related to CIS equipment. The Group continues to build its business based on a diversified customer base with top 5 customers collectively accounted for 22.1% of the Group's revenue in Q1 of this year. 80% of its revenue came from 109 customers.

## PROSPECTS

With the strong bookings received in Q1 of this year, we expect Group billings in Q2 to achieve a strong double digit percentage growth year-on-year. We expect bookings in Q2 to remain at a similar level as Q1. As we anticipate a higher billing from all three business segments, we expect the gross margin of the Group to continue to improve during the second quarter this year.
