Any conversion shall be made in amounts of not less than a whole multiple of HK$1,000,000 and no fraction of a Share shall be issued on conversion.

If the issue of Conversion Shares following the exercise by a Bondholder of the conversion rights attaching to the Convertible Bonds held by such Bondholder would result in:

(i) such Bondholder and parties acting in concert with it (within the meaning of the Takeovers Code), taken together, directly or indirectly (i) controlling or being interested in 30% or more of the entire issued voting share capital of the Company (or such other percentage as may from to time be specified in the Takeovers Code as being the level of triggering a mandatory general offer) as at the date of conversion; or (ii) exceeding 2% creeper rule under Rule 26.1 of the Takeovers Code within any 12 month period from a holding of voting rights of between 30% and 50% and a mandatory general offer obligation will be triggered under the Takeovers Code, unless either (i) such Bondholder and parties acting in concert with it comply with the Takeovers Code and make a general offer to acquire for all the Shares not already owned by them; or (ii) a whitewash waiver to waive the requirement for such Bondholder and parties acting in concert with it to make the mandatory general offer is approved by the Independent Shareholders and is granted by the Executive before the date of completion of the conversion; or

(iv) the Company not meeting the Public Float Requirement immediately after the conversion,

then the number of Conversion Shares to be issued pursuant to such conversion shall be limited to the maximum number of Shares issuable by the Company which would not in the reasonable opinion of the Company result in a breach of the Public Float Requirement or a breach of the Controlling Shareholder's Shareholding Level Requirement or mandatory general offer being triggered under the Takeovers Code (as the case may be) and the balance of the conversion rights attaching to the Convertible Bonds which the Bondholder sought to convert shall be suspended until such time when the Company is able to issue additional Shares in satisfaction of the exercise of the said balance of conversion rights attaching to the Convertible Bonds and at the same time comply with the Public Float Requirement or without triggering a mandatory general offer under the Takeovers Code or breach the Controlling Shareholder's Shareholding Level Requirement (as the case may be) or the general offer is made by such Bondholder or Shareholder and parties acting in concert with it respectively or a whitewash waiver is approved and granted (as the case may be) as set out above (the "**Takeovers Code and Listing Rules Implications Condition**").

Conversion period: The holder(s) of the Convertible Bonds shall have the right to convert the whole or part of the principal amount of the Convertible Bonds into Conversion Shares for the period commencing from the Business Day immediately following the first anniversary of the Issue Date up to 4:00 p.m. on the Maturity Date.

Conversion Price: The Conversion Price is initially HK$0.30 per Conversion Share, subject to adjustment provisions as summarised below.

Comparison of Conversion Price: The Conversion Price of HK$0.30 per Conversion Share represents:

(i) a premium of approximately 11.11% over the closing price of the Shares of HK$0.270 per Share as quoted on the Stock Exchange on the Last Trading Day;

(ii) a premium of approximately 12.78% over the average closing price of the Shares of approximately HK$0.266 per Share based on the closing prices of the Shares as quoted on the Stock Exchange for the 5 consecutive trading days up to and including the Last Trading Day;

(iii) a premium of approximately 13.21% over the average closing price of the Shares of approximately HK$0.265 per Share based on the closing prices of the Shares as quoted on the Stock Exchange for the 10 consecutive trading days up to and including the Last Trading Day;

(iv) a premium of approximately 3.45% over the closing price of the Shares of HK$0.290 per Share as quoted on the Stock Exchange on the Latest Practicable Date;

(v) a discount of approximately 77.78% to the unaudited consolidated net asset value per Share of approximately HK$1.35 as at 30 September 2016, calculated based on the Group's unaudited consolidated net assets of approximately HK$5,657.0 million as at 30 September 2016 and the 4,193,744,205 Shares in issue as at the Latest Practicable Date; and

(vi) a discount of approximately 80.26% to the adjusted unaudited consolidated net asset value per Share of approximately HK$1.52, calculated based on the Group's adjusted unaudited consolidated net assets of approximately HK$6,361.5 million, which represents the sum of the Group's unaudited consolidated net assets of approximately HK$5,657.0 million as at 30 September 2016 and the excess of approximately HK$704.5 million of the market value of the Group's properties of approximately HK$1,165.4 million as at 30 April 2017 as shown in the valuation report set out in Appendix II to this circular (after taking into account of approximately HK$223.1 million for the portion of the property the Group held in the PRC which the valuation report did not attribute value to) over the fair value of such properties of approximately HK$460.9 million as recognised in the unaudited consolidated financial statements for six months ended 30 September 2016, divided by 4,193,744,205 Shares in issue as at the Latest Practicable Date.

As the market price of the Shares have been trading at significant discount to the relevant consolidated net asset value per Share for many years, the Board considers that the market price of the Shares more accurately reflects the inherent value of the business of the Company. Given that (i) the Conversion Price was set at a premium of more than 10% over the closing price of the Shares on the Last Trading Day and the average closing price for the 10 consecutive trading days up to and including the Last Trading Day; and (ii) the funding needs for the proposed expansion plan and the benefits of the issue of Convertible Bonds as set out in the paragraph headed "Reasons for the issue of Convertible Bonds and use of proceeds", the Directors (not including the independent non-executive Directors who will express their view in the letter from the Independent Board Committee in this circular) consider that the Conversion Price is fair and reasonable.

Adjustments to Conversion Price: The Conversion Price may be adjusted in the event of any alteration in the capital structure of the Company whether arising by reason of a capitalisation of profits or reserves, rights issue or other offer of securities to holder of Shares (including any securities convertible into share capital or warrants or options to subscribe for any share capital of the Company), consolidation, sub-division or reduction of the share capital of the Company or otherwise howsoever except where any such event is specifically exempted under the terms and conditions of the Convertible Bonds, including but not limited to any issue or grant of Shares, options or other securities of the Company or any of its subsidiaries wholly or partly convertible into, or rights to acquire, Shares to the Directors or employees of the Company or any of its subsidiaries or their personal representatives pursuant to an employee share scheme of the Company or any of its subsidiaries.

In any such alteration in the capital structure of the Company, the Company shall prior to the Conversion Date instruct an Approved Professional Adviser to consider whether any adjustment should be made to the Conversion Price in order to fairly and appropriately reflect the relative interests of the Company and the Bondholder(s). The Directors shall make an adjustment to the Conversion Price in such manner as an Approved Professional Adviser certifies to be, in its opinion, appropriate.

Further provisions in relation to adjustment to Conversion Price:

(1) Where more than one event gives or may give rise to an adjustment to the Conversion Price occurs within such a short period of time that the Approved Professional Adviser considers in good faith that the operation of the above provisions would need to be subject to some modification in order to give the intended commercial result, such modification shall be made to the operation of the above provisions as may be advised by the Approved Professional Adviser, acting as an expert, to be in their opinion appropriate in order to give such intended result.

(2) No adjustment will be made to the Conversion Price (i) where Shares are allotted or issued pursuant to any exercise of the Conversion Rights or (ii) upon any issue or grant of Shares, options or other securities of the Group wholly or partly convertible into, or rights to acquire, Shares to directors or employees of the Group or their personal representatives pursuant to an employee share scheme of the Group.

(3) No adjustment involving an increase in the Conversion Price will be made, except in the case of a consolidation of the Shares.

Conversion Shares to be issued under the Convertible Bonds: The number of Shares to be issued upon conversion of the Convertible Bonds shall be determined by dividing the principal amount of the relevant Convertible Bonds to be converted by the Conversion Price in effect on the relevant conversion date.

Upon exercise of the conversion rights under the Convertible Bonds in full at the initial Conversion Price of HK$0.30 per Conversion Share, a total of 1,333,333,334 Conversion Shares will be issued, representing:

(i) approximately 31.79% of the issued share capital of the Company as at the Latest Practicable Date; and

(ii) approximately 24.12% of the issued share capital of the Company as enlarged by the issue of Conversion Shares.

Redemption upon maturity: Any Convertible Bond which remains outstanding by 4:00 p.m. (Hong Kong time) on the Maturity Date shall be redeemed by the Company at a redemption amount equal to the principal amount of the outstanding Convertible Bonds together with interest accrued thereon.

Redemption by the Company:	The Company may at any time during the period commencing from the Issue Date and expiring on the Maturity Date redeem the whole or part of the outstanding Convertible Bonds by giving the Bondholders not less than seven Business Days' prior notice at the redemption amount which is 100% of the principal amount of the outstanding Convertible Bonds to be redeemed together with interest accrued until payment in full.
Redemption by the Bondholders	Each Bondholder will have the unconditional right at any time during the period commencing from the Issue Date and expiring on the Maturity Date to require the Company to redeem the whole or part of the outstanding Convertible Bonds by giving the Company not less than 60 days prior notice at the redemption amount which is 100% of the principal amount of the outstanding Convertible Bonds to be redeemed together with interest accrued to the relevant date of redemption.
Redemption upon event of default:	Upon the occurrence of an event of default as described below and at any time thereafter, each of the Bondholders may, unless such event of default has been waived in writing by it, by notice in writing ("**Default Redemption Notice**") requires the Company to redeem the whole (but not part) of the outstanding principal amount of the Convertible Bonds at the redemption amount provided in the instrument constituting the Convertible Bonds whereupon such sum shall become due and payable in the manner provided in the instrument constituting the Convertible Bonds on the Business Day falling after seven Business Days of the date of such notice.
Voting rights:	The Convertible Bonds shall not confer on the Bondholder(s) the right to vote at any general meetings of the Company.
Listing:	No application has been or will be made for the listing of the Convertible Bonds on the Stock Exchange or any other stock exchange.

Transferability: Subject to the satisfaction of warranties stipulated in the instrument constituting the Convertible Bonds (or, if capable of being remedied, has been remedied) and subject to the Company's prior written consent, the Convertible Bonds may be transferred to any person in whole multiples of HK$1,000,000 (or such lesser amount as may represent the entire principal amount thereof). A transfer shall be effected by delivery of a certificate issued in the name of the Bondholder issued in respect of that Convertible Bond, with an instrument of transfer duly completed and signed by both the transferor and the transferee. No transfer of title to any Convertible Bond will be effective unless and until entered on the register of Bondholders.

Subject to the Listing Rules, the Convertible Bonds may not be transferred to connected persons of the Company.

Events of default: If, among others, any of the following events occurs, the holders of the Convertible Bonds may give notice to the Company that the Convertible Bonds are immediately due and payable at their principal amount together with interest accrued:

(1) **Payment default**: a default is made in the payment of interest due on the Convertible Bonds when due and such default shall not have been cured by payment by the Company within 15 days after the due date; or

(2) **Other default**: a default is made by the Company in the performance or observance of any covenant, condition or provision contained in the instrument constituting the Convertible Bonds or in the Convertible Bonds and on its part to be performed or observed (other than the covenant to pay the principal, premium (if any) and interest in respect of any of the Convertible Bonds) and such default continues for the period of 14 days next following the service by any holder of the Convertible Bonds on the Company of notice specifying brief details of such default and requiring such default to be remedied; or

(vi) it will at all times use its reasonable endeavours to ensure that the minimum public shareholding requirement of the Listing Rules is complied with.

REASONS FOR THE ISSUE OF CONVERTIBLE BONDS AND USE OF PROCEEDS

The Company is an investment holding company. The Group is principally engaged in the production and sale of knitted fabric, dyed yarn and garment products.

The Directors consider raising funds by issuing Convertible Bonds provides an opportunity for the Company to enhance its working capital and strengthen its capital base and financial position. Among the possible fund raising alternatives to the issue of the Convertible Bonds available to the Company, the Board considers the issue of the Convertible Bonds is the most appropriate fund raising method and beneficial to the Company after taking into account that (a) more time and costs (including underwriting commission, documentation preparation costs and professional fees) will be involved for pre-emptive issues (including rights issue and open offer) and considerable discount to the market prices of the Shares would be required, and the Company has recently completed the Rights Issue; and (b) it will not have an immediate dilution effect on the shareholding of the existing Shareholders. Further, despite the Board has not approached any Independent Third Parties for fund raising alternatives to the issue of Convertible Bonds, the Board expects that more time and costs are required to arrange for a placing of shares to Independent Third Parties as commercial terms are to be agreed upon. Hence, the Board does not consider pre-emptive issues or placing of shares to Independent Third Parties to be desirable alternatives to the issue of Convertible Bonds.

The Board considers that the issue of Convertible Bonds to the Subscribers signifies strong support from the Company's controlling shareholder to the Group and its confidence in the prospects and development of the Group, which will in turn enhance the Shareholders' and potential investors' confidence in the business of the Group.

The Directors (not including the independent non-executive Directors who will express their view in the letter from the Independent Board Committee in this circular) consider that the terms of the Subscription Agreement, which were arrived at after arm's length negotiations between the Company and the Subscribers, are fair and reasonable and are in the interests of the Company and the Shareholders as a whole.

The gross proceeds from the issue of the Convertible Bonds will be HK$400,000,000. The net proceeds from the issue of the Convertible Bonds of approximately HK$397,000,000, together with the remaining net proceeds from the placing completed on 17 May 2016 and the net proceeds from the Rights Issue, are intended to be used in the following manner: (i) construction of new warehouses; (ii) upgrading the wastewater treatment plant; (iii) upgrading existing production lines; (iv) modifying existing production facilities to accommodate the use of natural gas as an environmental-protection and energy-saving initiative; (v) acquiring new dyeing tanks; (vi) acquiring new production facilities for existing synthetic fabric manufacturing; (vii) establishing new printing production facilities; (viii) further expand the Group's production efficiencies and production capacity for synthetic fabric segment by pursuing appropriate acquisition opportunities in Taiwan and/or the PRC through acquiring technology or production plant; and (ix) as general working capital of the Group. Please refer to the paragraph headed "Change in use of proceeds" below for further details regarding the intended use of proceeds.

The net price for each Conversion Share is approximately HK$0.298.

As disclosed in the interim report of the Group for the six months ended 30 September 2016, bank balances and cash amounted to approximately HK$2,501 million, and coupled with the net proceeds of approximately HK$344.5 million from the Right Issue, the bank balances and cash of the Group amounted to approximately HK$2,845.5 million. As disclosed in the interim report of the Group for the six months ended 30 September 2016, as bank borrowings due within one year amounted to approximately HK$2,084 million, the general working capital of the Group will be significantly reduced upon repayment of bank borrowings. Further, the Group expects that the acquisition and construction costs under the current expansion plan of the Group, which is adopted as a result with the withholding of the expansion plan in Vietnam due to the withdrawal of the United States of America from the TPP, is likely to be higher than the original expansion plan in Vietnam, the Group might not have sufficient funds for its planned expansion to capture the growing demand from the global market and its existing customers on the Group's products, in particular synthetic fabric. As such, the Company considers additional funding is required in order to maintain sufficient general working capital level and flexibility in its business operations and expansion.

CHANGE IN USE OF PROCEEDS

As disclosed in the Announcement, after the withdrawal of the United States of America from the TPP, it is uncertain whether the TPP can bring the expected level of economic benefits to the signatories. The Directors are of the view that the preferential trading treatments that Vietnam could enjoy from the TPP could be adversely affected by the withdrawal. In light of the above reasons, the Directors believe that Vietnam might not be the most suitable location for the development of fabric manufacturing business of the Group. As disclosed in the prospectus of the Company dated 12 December 2016 regarding the Rights Issue, the Group will allocate the proceeds from the Rights Issue together with the remaining proceeds from the placing completed on 17 May 2016 for acquiring synthetic fabric production plant in Taiwan and/or the PRC if TPP is not implemented. The Board has resolved to withhold the plan to develop fabric manufacturing business in Vietnam for the time being and reallocate (i) the remaining net proceeds of approximately HK$128.5 million from the placing completed on 17 May 2016; (ii) the net proceeds of approximately HK$344.5 million from the Rights Issue; and (iii) the net proceeds of approximately HK$397 million from the issue of the Convertible Bonds, totalling approximately HK$870 million in the following manner:

(i) as to approximately HK$80 million for construction of new warehouses with an area of approximately 15,000 m^2 for storage of raw materials and inventories in Xinhui, the PRC, which is expected to complete in early 2018;

(ii) as to approximately HK$70 million for upgrading the wastewater treatment plant in Xinhui, the PRC, which, upon completion, is expected to enhance its daily treatment capacity from 20,000 tonnes to 32,000 tonnes. The upgrading is expected to complete by 2018;

(iii) as to approximately HK$60 million for upgrading existing production lines in Xinhui, the PRC, by adopting a more advanced automatic system, which is expected to enhance the production capacity by 15% and complete in early 2018;

(iv) as to approximately HK$25 million for modifying existing production facilities in Xinhui, the PRC, to accommodate the use of natural gas as an environmental-protection and energy saving initiative, which is expected to complete in late 2017;

(v) as to approximately HK$35 million for acquiring new dyeing tanks in Xinhui, the PRC, which is expected to enhance the dyeing capacity by 10%. Installation of the new dyeing tanks is expected to complete in late 2017;

(vi) as to approximately HK$50 million for acquiring new production facilities for the Group's existing synthetic fabric manufacturing, which is expected to enhance the production capacity by 20%. Installation of the facilities is expected to complete by 2018;

(vii) as to approximately HK$200 million for establishing new printing production facilities in Xinhui, the PRC (with approximately HK$50 million to the establish the new printing production plant and approximately HK$150 million to acquire necessary equipments), which is expected to be able to produce 2.5 million pounds of printing fabric annually and complete by late 2018; and

(viii)as to approximately HK$250 million for as general working capital of the Group (with approximately HK$150 million to purchase inventories and approximately HK$100 million to pay rental expenses, salaries and remuneration).

The remaining of such proceeds of approximately HK$100 million will be utilised to further expand the Group's production efficiencies and production capacity for synthetic fabric segment by pursuing appropriate acquisition opportunities in Taiwan and/or the PRC through acquiring technology or production plant. As at the Latest Practicable Date, the Company has not identified any potential investment and acquisition targets. The Board considers that the above change in use of proceeds will improve efficiency and effectiveness of its deployment which is advantageous to the development of the Group. The Directors (including the independent non-executive Directors) consider that the above change in use of proceeds is fair and reasonable and in the interests of the Company and the Shareholders as a whole.

As mentioned in the paragraph headed "Reasons for the issue of Convertible Bonds and use of proceeds" above, a major portion of the existing general working capital will be utilised to repay bank borrowings due in 2017, thus the general working capital of the Group will be significantly reduced. In addition, to capture the growing demand from the global market and its existing customers on the Group's products, the Board considers that certain portion of net proceeds from the issue of Convertible Bonds has to be retained by the Group as general working capital to purchase inventories so as to enhance the production level of the Group. As such, the Board considers that there are imminent funding needs by the Group for the abovementioned purposes.

As at the Latest Practicable Date and to the best of the Directors' knowledge, information and belief, after the considering of the above proposed expansion plan, the Board is of the view that the proceeds from the issue of Convertible Bonds will be able to satisfy the Company's expected funding needs for the next 12 months, without taking into account any additional working capital that may be required for the next 12 months should there be any further business expansion or development opportunities arise from time to time. If the Group identifies other investment or business opportunities which would require additional funding or placing opportunities, the Company may obtain additional funding through other debt or equity fund-raising activities (including but not limited to placing).

PRINCIPAL FACTORS AND REASONS CONSIDERED

In arriving at our opinion in respect of the Subscriptions and the Whitewash Wavier, we have taken into consideration the following principal factors and reasons:

A. THE SUBSCRIPTIONS

Business overview of the Group

With reference to the Board Letter, the Group is principally engaged in the production and sale of knitted fabric, dyed yarn and garment products.

Set out below are the consolidated financial information of the Group for the six months ended 30 September 2016 and two years ended 31 March 2016 as extracted from the Company's interim report for the six months ended 30 September 2016 (the "**2016/17 Interim Report**") and annual report for the year ended 31 March 2016 (the "**2016 Annual Report**"):

	For the six months ended 30 September 2016 (unaudited) *HK$'000*	For the year ended 31 March 2016 (audited) *HK$'000*	For the year ended 31 March 2015 (audited) *HK$'000*	Change from 2015 to 2016 *%*
Revenue	2,534,643	4,911,216	5,137,415	(4.40)
Gross profit	434,434	872,939	956,543	(8.74)
Profit for the period/year	84,740	249,520	516,400	(51.68)

	As at 30 September 2016 (unaudited) *HK$'000*	As at 31 March 2016 (audited) *HK$'000*	As at 31 March 2015 (audited) *HK$'000*	Change from 2015 to 2016 *%*
Bank balances and cash	2,501,592	2,111,088	2,003,390	5.38
Net assets	5,656,982	5,614,598	5,514,087	1.82
Bank borrowings — amount due within one year	2,084,261	1,849,123	2,247,489	(17.72)
Bank borrowings — amount due after one year	2,599,200	2,516,491	1,576,460	59.63

As illustrated by the above table, the Group's revenue and gross profit for the year ended 31 March 2016 ("**FY2016**") decreased by approximately 4.40% and 8.74% respectively as compared to the year ended 31 March 2015 ("**FY2015**"). Also, the Group recorded a substantial decrease in profit for FY2016 as compared to FY2015. With reference to the 2016 Annual Report, the decrease in profit for FY2016 was mainly due to (i) unfavourable market conditions together with the continuously surging production costs; and (ii) absence of the gain on disposal of subsidiaries which amounted to approximately HK$228 million for FY2015.

We also noted from the 2016 Annual Report that the Group's finance costs increased from approximately HK$124.6 million in FY2015 to approximately HK$140.4 million in FY2016, mainly due to the increase in bank borrowings of the Group. The Group used its best endeavour in obtaining favourable banking facilities with its bankers so as to reduce its finance costs. Furthermore, the Group's gearing ratio, being defined as net debt (representing by total bank borrowings net of cash and cash equivalents) to shareholders' funds, were approximately 38.0% and 40.2% as at 30 September 2016 and 31 March 2016 respectively, which were much higher than the Group's gearing ratio of approximately 32.1% as at 31 March 2015.

With reference to the 2016/17 Interim Report, the Group remains cautiously optimistic on the coming outlook of the textile and garment industry. The Group will continue to leverage on its prominent market position, extensive client network and well-established regional production bases to respond to the ever-changing market. The Group continues to expand its synthetic fabric production in order to capture the growing demand from the global market and its existing customers. The Group intends to further such expansion by pursuing appropriate acquisition opportunities in Taiwan and/or the PRC through acquiring technology or production plant to supplement its existing production.

Should the above strategies be implemented successfully, the Group's operation may be improved.

As at the Latest Practicable Date, the Concert Group were interested in 1,288,839,000 Shares in aggregate, representing approximately 30.74% of the entire issued share capital of the Company. Upon full conversion of the Convertible Bonds, the Concert Group will be interested in 2,622,172,334 Shares in aggregate, representing approximately 47.44% of the issued share capital of the Company as enlarged by the issue of the Conversion Shares (assuming that there is no other change to the issued share capital of the Company from the Latest Practicable Date and up to the date of full conversion of the Convertible Bonds).

Reasons for the issue of Convertible Bonds and use of proceeds

Funding needs of the Group

With reference to the Board Letter, the Directors consider raising funds by issuing Convertible Bonds provides an opportunity for the Company to enhance its working capital and strengthen its capital base and financial position.

As disclosed in 2016/17 Interim Report, the Group's bank balances and cash amounted to approximately HK$2,501 million as at 30 September 2016, and coupled with the net proceeds of approximately HK$344.5 million from the Right Issue, the bank balances and cash of the Group amounted to approximately HK$2,845.5 million. As disclosed in the 2016/17 Interim Report, as bank borrowings due within one year amounted to approximately HK$2,084 million, the general working capital of the Group will be significantly reduced upon repayment of bank borrowings. Furthermore, the Group expects that the acquisition and construction costs under the current expansion plan of the Group, which is adopted as a result with the withholding of the expansion plan in Vietnam due to the withdrawal of the United States of America from the TPP, is likely to be higher than the original expansion plan in Vietnam, the Group might not have sufficient funds for its planned expansion to capture the growing demand from the global market and its existing customers on the Group's products, in particular synthetic fabric. As such, the Company considers additional funding is required in order to maintain sufficient general working capital level and flexibility in its business operations and expansion.

In light of the above, we are of the view that issuing Convertible Bonds satisfies the Group's needs to maintain sufficient working capital level for its operations and potential business expansion.

Financing alternatives available to the Group

Save for the issuance of the placing of new Shares of the Company which was completed on 17 May 2016 and the Rights Issue which was completed on 6 January 2017, the Company did not conduct any equity fund raising activities for the 12 months immediately before the Latest Practicable Date.

Upon our enquiry with the Directors, we understand that apart from the issue of the Convertible Bonds, the Directors have also considered other fund raising alternatives for the Group, including both debt and equity financing. However, in view of the high gearing level and increasing finance cost of the Group, pure debt financing is considered to be less preferable.

In respect of equity financing, the Directors consider that (i) as the Rights Issue was completed in January 2017, the existing Shareholders may not be willing to participate in another rights issue/open offer, not to mention that the Rights Issue was under-subscribed; and (ii) placing/subscription of new Shares will have immediate dilution effect on the shareholding interests of the existing Shareholders.

In light of the above as well as (i) the factors considered by the Board as stated under the section headed "REASONS FOR THE ISSUE OF CONVERTIBLE BONDS AND USE OF PROCEEDS" of the Board Letter; and (ii) that the Convertible Bonds will not have an immediate dilution effect on the shareholding of the existing Shareholders upon the completion of the Subscriptions, the Directors considered that the issue of the Convertible Bond is the most appropriate fund raising method and beneficial to the Company.

Use of proceeds

The Company had raised net proceeds of approximately HK$257 million from a placing completed on 17 May 2016 and approximately HK$344.5 million from the Rights Issue completed on 6 January 2017, intending to apply such proceeds for the planned expansion of the Group to establish new production facilities for fabric manufacturing in Vietnam.

Nevertheless, for the reasons set out under the section headed "CHANGE IN USE OF PROCEEDS" of the Board Letter, the Board has resolved to withhold the plan to develop fabric manufacturing business in Vietnam for the time being and reallocate (i) the remaining proceeds of approximately HK$128.5 million from the placing completed on 17 May 2016; (ii) the net proceeds of approximately HK$344.5 million from the Rights Issue; and (iii) the net proceeds of approximately HK$397 million from the issue of the Convertible Bonds, totalling approximately HK$870 million in the following manner:

(i) as to approximately HK$80 million for construction of new warehouses with an area of approximately 15,000 m^2 for raw materials and inventories in Xinhui, the PRC, which is expected to complete in early 2018;

(ii) as to approximately HK$70 million for upgrading the wastewater treatment plant in Xinhui, the PRC, which, upon completion, is expected to enhance its daily treatment capacity from 20,000 tonnes to 32,000 tonnes. The upgrading is expected to complete by 2018;

(iii) as to approximately HK$60 million for upgrading existing production lines in Xinhui, the PRC, by adopting a more advanced automatic system, which is expected to enhance the production capacity by 15% and complete in early 2018;

(iv) as to approximately HK$25 million for modifying existing production facilities in Xinhui, the PRC, to accommodate the use of natural gas as an environmental-protection and energy saving initiative, which is expected to complete in late 2017;

(v) as to approximately HK$35 million for acquiring new dyeing tanks in Xinhui, the PRC, which is expected to enhance the dyeing capacity by 10%. Installation of the new dyeing tanks is expected to complete in late 2017;

(vi) as to approximately HK$50 million for acquiring new production facilities for the Group's existing synthetic fabric manufacturing, which is expected to enhance the production capacity by 20%. Installation of the facilities is expected to complete by 2018;

(vii) as to approximately HK$200 million for establishing new printing production facilities in Xinhui, the PRC (with approximately HK$50 million to the establish the new printing production plant and approximately HK$150 million to acquire necessary equipment), which is expected to be able to produce 2.5 million pounds of printing fabric annually and complete by late 2018; and

(viii) as to approximately HK$250 million for as general working capital of the Group (with approximately HK$150 million to purchase inventories and HK$100 million to pay rental expenses, salaries and remuneration).

The remaining of such proceeds of approximately HK$100 million will be utilised to further expand the Group's production efficiencies and production capacity for synthetic fabric segment by pursuing appropriate acquisition opportunities in Taiwan and/or the PRC through acquiring technology or production plant. The Board considers that the above change in use of proceeds will improve efficiency and effectiveness of its deployment which is advantageous to the development of the Group.

As mentioned in the paragraph headed "Reasons for the issue of Convertible Bonds and use of proceeds" of the Board Letter, a major portion of the existing general working capital will be utilised to repay bank borrowings due in 2017, thus the general working capital of the Group will be significantly reduced. In addition, to capture the growing demand from the global market and its existing customers on the Group's products, the Board considers that certain portion of net proceeds from the issue of Convertible Bonds has to be retained by the Group as general working capital to purchase inventories so as to enhance the production level of the Group. As such, the Board considers that there are imminent funding needs by the Group for the abovementioned purposes.

For our due diligence purpose, we have obtained and discussed with the Directors the plan and budgeting for the aforesaid use of proceeds. As the intended use of proceeds as set out above can facilitate the development of the Group's core business, we consider the intended use of proceeds to be justifiable.

In light of the above, we are of the view that the Subscriptions are in the interest of the Company and the Shareholders as a whole.

Principal terms of the Convertible Bonds

Set out below are the summary terms of the Convertible Bonds, details of which are set out under the section headed "PRINCIPAL TERMS OF THE CONVERTIBLE BONDS" of the Board Letter.

Principal amount:	HK$400,000,000

Upon exercise of the conversion rights under the Convertible Bonds in full at the initial Conversion Price of HK$0.30 per Conversion Share, a total of 1,333,333,334 Conversion Shares will be issued, representing: (i) approximately 31.79% of the issued share capital of the Company as at the Latest Practicable Date; and (ii) approximately 24.12% of the issued share capital of the Company as enlarged by the issue of Conversion Shares.

Analysis on the Conversion Price

The Conversion Price of HK$0.30 represents:

(a) a premium of approximately 3.45% over the closing price of HK$0.290 per Share as quoted on the Stock Exchange on the Latest Practicable Date;

(b) a premium of approximately 11.11% (the "**LTD Premium**") over the closing price of HK$0.270 per Share as quoted on the Stock Exchange on the Last Trading Day;

(c) a premium of approximately 12.78% over the average closing price of approximately HK$0.266 per Share as quoted on the Stock Exchange for the last five consecutive trading days up to and including the Last Trading Day;

(d) a premium of approximately 13.21% over the average closing price of approximately HK$0.265 per Share as quoted on the Stock Exchange for the last ten consecutive trading days up to and including the Last Trading Day;

(e) a discount of approximately 77.78% (the "**NAV Discount**") to the unaudited consolidated net asset value per Share of approximately HK$1.35 as at 30 September 2016, calculated based on the Group's unaudited consolidated net assets of approximately HK$5,657.0 million as at 30 September 2016 and the 4,193,744,205 Shares in issue as at the Latest Practicable Date; and

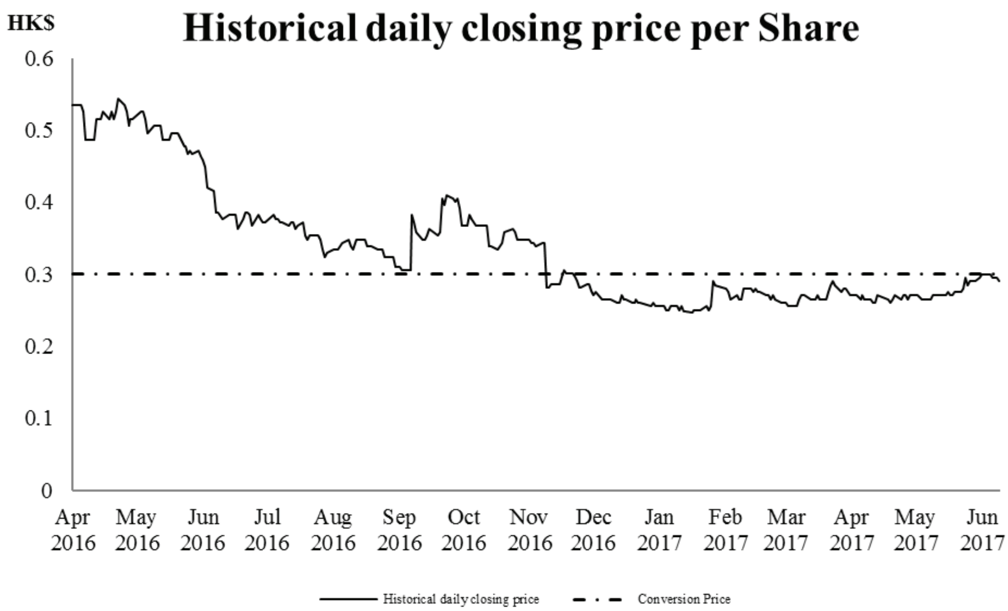
(f) a discount of approximately 80.26% to the adjusted unaudited consolidated net asset value per Share of approximately HK$1.52, calculated based on the Group's adjusted unaudited consolidated net assets of approximately HK$6,361.5 million, which represents the sum of the Group's unaudited consolidated net assets of approximately HK$5,657.0 million as at 30 September 2016 and the excess of approximately HK$704.5 million of the market value of the Group's properties of approximately HK$1,165.4 million as at 30 April 2017 as shown in the valuation report set out in Appendix II to the Circular (after taking into account of approximately HK$223.1 million for the portion of the property the Group held in the PRC which the valuation report did not attribute value to) over the fair value of such properties of approximately HK$460.9 million as recognised in the unaudited consolidated financial statements for six months ended 30 September 2016, divided by 4,193,744,205 Shares in issue as at the Latest Practicable Date.

Set out below is a comparison between historical closing prices of the Shares and the Group's consolidated net asset value per Share:

Date	Historical closing price per Share	The Group's consolidated net asset value per Share	Discount
As at 30 September 2016	HK$0.34	Approximately HK$2.04	83.34%
As at 31 March 2016	HK$0.45	Approximately HK$2.47	81.79%
As at 30 September 2015	HK$0.803	Approximately HK$2.69	70.15%
As at 31 March 2015	HK$0.743	Approximately HK$2.96	74.90%
As at 30 September 2014	HK$0.75	Approximately HK$3.07	75.60%

As the Shares were trading at substantial discount to the Group's consolidated net asset value per Share for years as demonstrated above, we consider that the NAV Discount is acceptable.

In order to assess the fairness and reasonableness of the Conversion Price, we have reviewed the daily closing prices of the Shares as quoted on the Stock Exchange from 1 April 2016 up to and including the Latest Practicable Date (the "**Review Period**"). The comparison of daily closing prices of the Shares and the Conversion Price is illustrated as follows:



Source: the Stock Exchange's website

Note: The closing prices of the Shares from 1 April 2016 to 30 November 2016 (both days inclusive) were adjusted for the effect of the Rights Issue, details of which were set out in the (a) announcements of the Company dated 8 November 2016 and 5 January 2016; and (b) prospectus of the Company dated 12 December 2016.

During the Review Period, the lowest and highest closing prices of the Shares as quoted on the Stock Exchange were HK$0.246 recorded on 16 January 2017 and HK$0.544 recorded on 22 April 2016 respectively. The Conversion Price of HK$0.30 is within the highest and lowest closing prices of the Shares as quoted on the Stock Exchange during the Review Period.

The closing prices of the Shares formed a general sliding trend from 1 April 2016 to 2 September 2016. There was recovery in the closing prices of the Shares from September 2016 to early November 2016. Nevertheless, the closing price of the Shares dropped to HK$0.281 on 9 November 2016. Since 22 November 2016, the closing prices of the Shares had not exceeded the Conversion Price.

As part of our analysis, we have also identified those subscription/placing of convertible bonds/notes under specific mandate which were announced by companies listed on the Stock Exchange from 1 March 2017 up to including the Latest Practicable Date (the "**Comparables**"). We consider that a sampling period of three months is adequate and appropriate given that such period is sufficiently recent to demonstrate the prevailing market practices prior to and including the Last Practicable Date. We have searched over the website of the Stock Exchange, and to the best of our knowledge and as far as we are aware of, we found 13 transactions which met the said criteria and they are exhaustive. Shareholders should note that the businesses, operations and prospects of the Company are not the same as the Comparables.

Note: The issuer has right to extend the maturity date by a year.

We noted from the above table that the conversion prices of the Comparables ranged from a discount of approximately 72.22% to a premium of approximately 106.90% to/over the respective closing prices of their shares on the last trading day prior to the release of announcement/date of agreement in relation to the respective subscription/placing of convertible bonds/notes (the "**Discount/Premium Market Range**"). The LTD Premium falls within the Discount/Premium Market Range. Nevertheless, as the aforesaid range is wide, we consider that such range may not be an appropriate reference for our analysis.

Having considered that

(i) the Conversion Price of HK$0.30 is within the highest and lowest closing prices of the Shares as quoted on the Stock Exchange during the Review Period; and

(ii) since 22 November 2016, the closing prices of the Shares had not exceeded the Conversion Price,

we are of the view that the Conversion Price is fair and reasonable.

Analysis on the interest rate

As presented by the table above, the Comparables had nil annual interest rate to 13% annual interest rate (the "**Interest Market Range**").

With reference to the 2016/17 Interim Report, during the six months ended 30 September 2016, the bank borrowings of the Group carry interest at market rates ranging from 1.59% to 6.59% per annum (the "**Group's Borrowing Rates Range**").

The Convertible Bond bears the Interest Rate of 5% per annum, which is within the Interest Market Range and the Group's Borrowing Rates Range. We consider the Interest Rate to be fair and reasonable.

Having considered the above, we are of the view that the terms of the Subscription Agreement are on normal commercial terms and are fair and reasonable so far as the Independent Shareholders are concerned.

Possible dilution effect on the shareholding interests of the public Shareholders

With reference to the shareholding table in the section headed "EFFECT ON THE SHAREHOLDING STRUCTURE" of the Board Letter, the shareholding interests of the other public Shareholders would be diluted by approximately 16.62 percent point as a result of the full conversion of the Convertible Bonds. In this regard, taking into account (i) the reasons for the issue of Convertible Bonds and the intended use of proceeds; and (ii) the terms of the Subscription Agreement being fair and reasonable, we are of the view that the said level of dilution to the shareholding interests of the public Shareholders as a result of the full conversion of the Convertible Bonds is acceptable.

Recommendation on the Subscriptions

Having taken into consideration the factors and reasons as stated above, we are of the opinion that (i) the terms of the Subscription Agreement are on normal commercial terms and are fair and reasonable so far as the Independent Shareholders are concerned; and (ii) the Subscriptions are in the interests of the Company and the Shareholders as a whole. Accordingly, we recommend the Independent Board Committee to advise the Independent Shareholders to vote in favour of the resolution(s) to be proposed at the SGM to approve the Subscription Agreement and the transactions contemplated thereunder and we recommend the Independent Shareholders to vote in favour of the resolution in this regard.

B. THE WHITEWASH WAIVER

As at the Latest Practicable Date, the Concert Group in aggregate are interested in 1,288,839,000 Shares, representing approximately 30.74% of the entire issued share capital of the Company. Assuming the Convertible Bonds are converted in full at the initial Conversion Price of HK$0.30 per Conversion Share and there is no other change in the issued share capital of the Company from the date of the Subscription Agreement and up to Completion, the Concert Group will be interested in 2,622,172,334 Shares, which in aggregate representing approximately 47.44% of the issued share capital of the Company as enlarged by the issuance of the Conversion Shares.

Under Rule 26.1 of the Takeovers Code, the Subscribers would, unless a waiver from strict compliance with Rule 26.1 of the Takeovers Code is granted by the Executive, be obliged to make a mandatory general offer for all the issued Shares not already owned or agreed to be acquired by the Subscribers as a result of the issue of Conversion Shares pursuant to the proposed conversion of the Convertible Bonds in full. The Subscribers made an application to the Executive for the Whitewash Waiver pursuant to Note 1 on dispensations from Rule 26 of the Takeovers Code. The Whitewash Waiver, if granted by the Executive, will be subject to, among other things, the approval of Independent Shareholders by way of poll at the SGM.

Given that the completion of the Subscriptions are conditional upon, amongst other, the Executive or any delegate of the Executive having granted the Whitewash Waiver pursuant to the Takeovers Code and the satisfaction of any condition attached to the Whitewash Waiver, and the Whitewash Waiver not being revoked, if the Whitewash Waiver is not granted by the Executive, the Subscriptions will not proceed.

In view of (i) that the Subscriptions are more preferable method of fund raising for the Group; (ii) the proposed use of net proceeds from the Subscriptions can facilitate the development of the Group's core businesses; and (iii) the terms of the Subscription Agreement being fair and reasonable so far as the Independent Shareholders are concerned, we are of the opinion that the approval of the Whitewash Waiver, which is a prerequisite for the completion of the Subscriptions, is in the interests of the Company and the Independent Shareholders as a whole and is fair and reasonable for the purpose of proceeding with the Subscriptions.

Recommendation on the Whitewash Waiver

Having taken into consideration the reasons for and possible benefits of the Subscriptions and that the Subscriptions are conditional upon, among other things, the Executive or any delegate of the Executive having granted the Whitewash Waiver pursuant to the Takeovers Code and the satisfaction of any condition attached to the Whitewash Waiver, and the Whitewash Waiver not being revoked, we consider that the Whitewash Waiver is fair and reasonable so far as the Independent Shareholders are concerned and is in the interests of the Company and the Shareholders as a whole. Accordingly, we recommend the Independent Board Committee to advise the Independent Shareholders to vote in favour of the relevant resolution to be proposed at the SGM to approve the Whitewash Waiver and we recommend the Independent Shareholders to vote in favour of the resolution in this regard.

notes:

(i) The Group accounts for changes in the Group's ownership interests in subsidiaries that do not result in change in control over those subsidiaries as equity transactions and any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recorded in special reserve.

HK$7,491,000 of the special reserve represents the difference between the net proceeds from the issue of new shares by Highlight China, a former subsidiary of the Company, as part of its scheme to list its shares on the Stock Exchange and the adjustment to the non-controlling interests. During the year ended 31 March 2015, this amount was released upon the Group's disposal of its entire equity interest in Highlight China.

(ii) The capital reserve of the Group represents the difference between the nominal value of shares issued by the Company and the aggregate nominal value of the issued share capital of subsidiaries acquired pursuant to a group reorganisation which became effective on 22 April 1996, and as reduced by the amount arising from a capital reduction in January 2001.

HKFRS 9 "Financial Instruments"

HKFRS 9 issued in 2009 introduced new requirements for the classification and measurement of financial assets. HKFRS 9 was subsequently amended in 2010 to include requirements for the classification and measurement of financial liabilities and for derecognition, and in 2013 to include the new requirements for general hedge accounting. Another revised version of HKFRS 9 was issued in 2014 mainly to include a) impairment requirements for financial assets and b) limited amendments to the classification and measurement requirements by introducing a "fair value through other comprehensive income" ("**FVTOCI**") measurement category for certain simple debt instruments.

Key requirements of HKFRS 9:

- all recognised financial assets that are within the scope of HKAS 39 "Financial Instruments: Recognition and Measurement" are required to be subsequently measured at amortised cost or fair value. Specifically, debt investments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortised cost at the end of subsequent accounting periods. Debt instruments that are held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets, and that have contractual terms that give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, are generally measured at FVTOCI. All other debt investments and equity investments are measured at their fair value at the end of subsequent accounting periods. In addition, under HKFRS 9, entities may make an irrevocable election to present subsequent changes in the fair value of an equity investment (that is not held for trading) in other comprehensive income, with only dividend income generally recognised in profit or loss.

- with regard to the measurement of financial liabilities designated as at fair value through profit or loss, HKFRS 9 requires that the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is presented in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Changes in fair value attributable to a financial liability's credit risk are not subsequently reclassified to profit or loss. Under HKAS 39, the entire amount of the change in the fair value of the financial liability designated as fair value through profit or loss is presented in profit or loss.

- in relation to the impairment of financial assets, HKFRS 9 requires an expected credit loss model, as opposed to an incurred credit loss model under HKAS 39. The expected credit loss model requires an entity to account for expected credit losses and changes in those expected credit losses at each reporting date to reflect changes in credit risk since initial recognition. In other words, it is no longer necessary for a credit event to have occurred before credit losses are recognised.

- the new general hedge accounting requirements retain the three types of hedge accounting mechanisms currently available in HKAS 39. Under HKFRS 9, greater flexibility has been introduced to the types of transactions eligible for hedge accounting, specifically broadening the types of instruments that qualify for hedging instruments and the types of risk components of non-financial items that are eligible for hedge accounting. In addition, the retrospective quantitative effectiveness test has been removed. Enhanced disclosure requirements about an entity's risk management activities have also been introduced.

The Directors anticipate that the adoption of HKFRS 9 in the future may have an impact on the Group's financial assets and financial liabilities based on the analysis of the Group's financial assets and liabilities as at 31 March 2016. However, it is not practicable to provide a reasonable estimate of the effect of HKFRS 9 until the Group performs a detailed review.

HKFRS 15 "Revenue from Contracts with Customers"

HKFRS 15 was issued which establishes a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. HKFRS 15 will supersede the current revenue recognition guidance including HKAS 18 "Revenue", HKAS 11 "Construction Contracts" and the related Interpretations when it becomes effective.

The core principle of HKFRS 15 is that an entity should recognise revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Specifically, the Standard introduces a 5-step approach to revenue recognition:

- Step 1: Identify the contract(s) with a customer
- Step 2: Identify the performance obligations in the contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to the performance obligations in the contract
- Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation

Under HKFRS 15, an entity recognises revenue when (or as) a performance obligation is satisfied, i.e. when 'control' of the goods or services underlying the particular performance obligation is transferred to the customer. Far more prescriptive guidance has been added in HKFRS 15 to deal with specific scenarios. Furthermore, extensive disclosures are required by HKFRS 15.

The Directors anticipate that the application of HKFRS 15 in the future may have a material impact on the amounts reported and disclosures made in the Group's consolidated financial statements. However, it is not practicable to provide a reasonable estimate of the effect of HKFRS 15 until the Group performs a detailed review.

HKFRS 16 "Leases"

HKFRS 16, which upon the effective date will supersede HKAS 17 "Leases", introduces a single lessee accounting model and requires a lessee to recognise assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. Specifically, under HKFRS 16, a lessee is required to recognise a right-of-use asset representing its right to use the underlying leased asset and a lease liability representing its obligation to make lease payments. Accordingly, a lessee should recognise depreciation of the right-of-use asset and interest on the lease liability, and also classifies cash repayments of the lease liability into a principal portion and an interest portion and presents them in the statement of cash flows. Also, the right-of-use asset and the lease liability are initially measured on a present value basis. The measurement includes non-cancellable lease payments and also includes payments to be made in optional periods if the lessee is reasonably certain to exercise an option to extend the lease, or not to exercise an option to terminate the lease. This accounting treatment is significantly different from the lessee accounting for leases that are classified as operating leases under the predecessor standard, HKAS 17.

In respect of the lessor accounting, HKFRS 16 substantially carries forward the lessor accounting requirements in HKAS 17. Accordingly, a lessor continues to classify its leases as operating leases or finance leases, and to account for those two types of leases differently.

The Directors will assess the impact of the application of HKFRS 16. For the moment, it is not practicable to provide a reasonable estimate of the effect of the application of HKFRS 16 until the Group performs a detailed review.

Except as described above, the Directors anticipate that the application of the other new and revised HKFRSs in issue but not yet effective will not have material impact on the Group's consolidated financial statements.

3. SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements have been prepared in accordance with HKFRSs issued by the HKICPA. In addition, the consolidated financial statements include applicable disclosures required by the Listing Rules and by the Hong Kong Companies Ordinance at the end of each reporting period.

The consolidated financial statements have been prepared on the historical cost basis except for investment properties and certain financial instruments which are measured at fair values, as explained in the accounting policies set out below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of HKFRS 2 "Share-based Payment", leasing transactions that are within the scope of HKAS 17, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in HKAS 2 "Inventories" or value in use in HKAS 36 "Impairment of Assets".

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

- Level 3 inputs are unobservable inputs for the asset or liability.

The principal accounting policies are set out below.

Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company and its subsidiaries. Control is achieved when the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Group gains control until the date when the Group ceases to control the subsidiary.

Profit or loss and each item of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies.

All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

Changes in the Group's ownership interests in existing subsidiaries

Changes in the Group's ownership interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to owners of the Company.

When the Group loses control of a subsidiary, a gain or loss is recognised in profit or loss and is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any non-controlling interests. All amounts previously recognised in other comprehensive income in relation to that subsidiary are accounted for as if the Group had directly disposed of the related assets or liabilities of the subsidiary (i.e. reclassified to profit or loss or transferred to another category of equity as specified/permitted by applicable HKFRSs). The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under HKAS 39, when applicable, the cost on initial recognition of an investment in an associate or a joint venture.

Business combinations

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are generally recognised in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value, except that:

- deferred tax assets or liabilities, and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with HKAS 12 "Income Taxes" and HKAS 19 "Employee Benefits" respectively;

- liabilities or equity instruments related to share-based payment arrangements of the acquiree or share-based payment arrangements of the Group entered into to replace share-based payment arrangements of the acquiree are measured in accordance with HKFRS 2 at the acquisition date (see the accounting policy below); and

- assets (or disposal groups) that are classified as held for sale in accordance with HKFRS 5 "Non-current Assets Held for Sale and Discontinued Operations" are measured in accordance with that standard.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after re-assessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation may be initially measured either at fair value or at the non-controlling interests' proportionate share of the recognised amounts of the acquiree's identifiable net assets. The choice of measurement basis is made on a transaction-by-transaction basis. Other types of non-controlling interests are measured at their fair value or, when applicable, on the basis specified in another HKFRS.

Goodwill

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business (see the accounting policy above) less accumulated impairment losses, if any.

For the purposes of impairment testing, goodwill is allocated to each of the Group's cash-generating unit ("**CGU**") (or group of CGUs) that is expected to benefit from the synergies of the combination.

A CGU to which goodwill has been allocated is tested for impairment annually or more frequently when there is an indication that the unit may be impaired. For goodwill arising on an acquisition in a reporting period, the CGU to which goodwill has been allocated is tested for impairment before the end of that reporting period. If the recoverable amount of the CGU is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit on a pro rata basis based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

On disposal of the relevant CGU, the attributable amount of goodwill is included in the determination of the amount of profit or loss on disposal.

Investment in a joint venture

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The results and assets and liabilities of joint ventures are incorporated in these consolidated financial statements using the equity method of accounting. Under the equity method, an investment in a joint venture is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the joint venture. When the Group's share of losses of joint venture exceeds the Group's interest in that joint venture (which includes any long-term interests that, in substance, form part of the Group's net investment in the joint venture), the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the joint venture.

An investment in a joint venture is accounted for using the equity method from the date on which the investee becomes a joint venture. On acquisition of the investment in a joint venture, any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

The requirements of HKAS 39 are applied to determine whether it is necessary to recognise any impairment loss with respect to the Group's investment in a joint venture. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with HKAS 36 "Impairment of Assets" as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss recognised forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with HKAS 36 to the extent that the recoverable amount of the investment subsequently increases.

Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances.

Revenue from the sale of goods is recognised when the goods are delivered and titles have passed, at which time all the following conditions are satisfied:

- the Group has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Group; and

- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Service income and subcontracting income are recognised when services are provided.

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts the estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

The Group's accounting policy for recognition of revenue from operating leases is described in the accounting policy for leasing below.

Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Group as lessor

Rental income from operating leases is recognised in the profit or loss on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised as an expense on a straight-line basis over the lease term.

The Group as lessee

Operating lease payments are recognised as an expense on a straight-line basis over the term of the relevant lease.

Leasehold land and buildings

When a lease includes both land and building elements, the Group assesses the classification of each element as a finance or an operating lease separately based on the assessment as to whether substantially all the risks and rewards incidental to ownership of each element have been transferred to the Group, unless it is clear that both elements are operating lease, in which case the entire lease is classified as an operating lease. Specifically, the minimum lease payments (including any lump-sum upfront payments) are allocated between the land and the building elements in proportion to the relative fair values of the leasehold interests in the land element and building element of the lease at the inception of the lease.

To the extent the allocation of the lease payments can be made reliably, interest in leasehold land that is accounted for as an operating lease is presented as "prepaid lease payments" in the consolidated statement of financial position and is released over the lease term on a straight-line basis. When the lease payments cannot be allocated reliably between the land and building elements, the entire lease is generally classified as a finance lease and accounted for as property, plant and equipment.

Property, plant and equipment

Property, plant and equipment including leasehold land (classified as finance lease) and buildings held for use in the production or supply of goods or services, or for administrative purposes (other than construction in progress as described below) are stated in the consolidated statement of financial position at cost less subsequent accumulated depreciation and subsequent accumulated impairment losses, if any.

Properties in the course of construction for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Costs include professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Group's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Depreciation is recognised so as to write off the cost of items of assets (other than construction in progress) less their residual values over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

If an item of property, plant and equipment becomes an investment property because its use has changed as evidenced by end of owner-occupation, any difference between the carrying amount and the fair value of that item at the date of transfer is recognised in other comprehensive income and accumulated in property revaluation reserve. On the subsequent sale or retirement of the asset, the relevant revaluation reserve will be transferred directly to retained profits.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

When buildings are in the course of development for production or for administrative purposes, the release of prepaid lease payments during the construction period is included as part of costs of buildings under construction. Buildings under construction are carried at cost, less any identified impairment losses. Depreciation of buildings commences when they are available for use (i.e. when they are in the location and condition necessary for them to be capable of operating in the manner intended by management).

Investment properties

Investment properties are properties held to earn rentals and/or for capital appreciation.

Investment properties are initially measured at cost, including any direct attributable expenditure. Subsequent to initial recognition, investment properties are measured at their fair values. All of the Group's properties interests held under operating leases to earn rentals and/or for capital appreciation purposes are accounted for as investment properties and are measured using the fair value model. Gains or losses arising from changes in the fair value of investment properties are included in profit or loss for the period in which it arises.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from its disposals. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the profit or loss in the period in which the property is derecognised.

Intangible asset

Intangible asset acquired separately

Intangible asset with indefinite useful life that is acquired separately is carried at cost less subsequent accumulated impairment losses (see the accounting policy in respect of impairment losses on tangible and intangible assets below).

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss in the period when the asset is derecognised.

Impairment losses on tangible and intangible assets other than goodwill

At the end of the reporting period, the Group reviews the carrying amounts of its tangible and intangible assets with finite useful lives to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the CGU to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual CGUs, or otherwise they are allocated to the smallest group of CGUs for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives are tested for impairment at least annually, and whenever there is an indication that they may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or a CGU) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or a CGU) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or a CGU) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

Foreign currencies

In preparing the financial statements of each individual group entity, transactions in currencies other than the functional currency of that entity (foreign currencies) are recognised at the rates of exchanges prevailing on the dates of the transactions. At the end of the reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences on monetary items are recognised in profit or loss in the period in which they arise except for:

- exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings;

- exchange differences on transactions entered into in order to hedge certain foreign currency risks (see the accounting policies below); and

- exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (therefore forming part of the net investment in the foreign operation), which are recognised initially in other comprehensive income and reclassified from equity to profit or loss on repayment of the monetary items.

For the purposes of presenting the consolidated financial statements, the assets and liabilities of the Group's entities are translated into the presentation currency of the Group (i.e. HK$) using exchange rates prevailing at the end of each reporting period. Income and expenses items are translated at the average exchange rates for the period, unless exchange rates fluctuate significantly during the period, in which case, the exchange rates prevailing at the dates of transactions are used. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity under the heading of translation reserve (attributed to non-controlling interests as appropriate).

On the disposal of a foreign operation (i.e. a disposal of the Group's entire interest in a foreign operation, a disposal involving loss of control over a subsidiary that includes a foreign operation, or a partial disposal of an interest in a joint arrangement that includes a foreign operation of which the retained interest becomes a financial asset), all of the exchange differences accumulated in equity in respect of that operation attributable to the owners of the Company are reclassified to profit or loss.

In addition, in relation to a partial disposal of a subsidiary that includes a foreign operation that does not result in the Group losing control over the subsidiary, the proportionate share of accumulated exchange differences are re-attributed to non-controlling interests and are not recognised in profit or loss. For all other partial disposals (i.e. partial disposals of joint arrangements that do not result in the Group losing joint control), the proportionate share of the accumulated exchange differences is reclassified to profit or loss.

Goodwill and fair value adjustments on identifiable assets acquired arising on an acquisition of a foreign operation are treated as assets and liabilities of that foreign operation and translated at the rate of exchange prevailing at the end of each reporting period. Exchange differences arising are recognised in other comprehensive income.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

Government grants

Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises as expenses the related costs for which the grants are intended to compensate.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognised in profit or loss in the period in which they become receivable.

Retirement benefit costs

Payments to the Group's defined contribution retirement benefit plans, Mandatory Provident Fund Scheme and state-managed retirement benefit schemes are recognised as expenses when employees have rendered services entitling them to the contributions.

Share-based payment transactions

Equity-settled share-based payment transactions

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. Details regarding the determination of the fair value of equity-settled share based transactions are set out in Note 34.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of equity instruments that will eventually vest, with a corresponding increase in equity (share option reserve).

For share options that vest immediately at the date of grant, the fair value of the share options granted is expensed immediately to profit or loss. At the end of each reporting period, the Group revises its estimate of the number of options that are expected to ultimately vest. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to share option reserve.

When share options are exercised, the amount previously recognised in share option reserve will be transferred to share premium. When the share options are forfeited after the vesting date or are still not exercised at the expiry date, the amount previously recognised in share option reserve will be transferred to accumulated profits.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from "profit before tax" as reported in the consolidated statement of profit or loss and other comprehensive income because of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax base used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and interest in a joint venture, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rate (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

For the purposes of measuring deferred tax liabilities and deferred tax assets for investment properties that are measured using the fair value model, the carrying amounts of such properties are presumed to be recovered entirely through sale, unless the presumption is rebutted. The presumption is rebutted when the investment property is depreciable and is held within a business model whose objective is to consume substantially all economic benefits embodied in the investments property over time, rather than through sale.

Current and deferred tax is recognised in profit or loss except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost of inventories are determined on a weighted average method. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Financial instruments

Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets or financial liabilities at fair value through profit or loss ("**FVTPL**")) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognised immediately in profit or loss.

Financial assets

Financial assets are classified into the following specified categories: financial assets at FVTPL, loans and receivables and available-for-sale ("**AFS**") financial assets. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset, or, where appropriate, a shorter period to the net carrying amount on initial recognition.

Interest income is recognised on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL.

Financial assets at FVTPL

Financial assets are classified as at FVTPL when the financial asset is either held for trading or it is designated as at FVTPL.

A financial asset is classified as held for trading if:

- it has been acquired principally for the purpose of selling in the near term; or
- on initial recognition it is a part of an identified portfolio of financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

A financial asset other than a financial asset held for trading may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- the financial asset forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and HKAS 39 permits the entire combined contract to be designated as at FVTPL.

The Group's financial assets classified as financial assets at FVTPL are derivatives that are not designated and effective as hedging instruments and restricted bank deposit.

Financial assets at FVTPL are stated at fair value, with any gains or losses arising from remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss includes any dividend or interest earned on the financial assets and is included in the "other gains and losses" line item. Fair value is determined in the manner described in Note 6.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Subsequent to initial recognition, loans and receivables (including trade and bills receivables, other receivables and bank balances and cash) are measured at amortised cost using the effective interest method, less any impairment (see accounting policy on impairment loss of financial assets below).

Interest income is recognised by applying the effective interest rate, except for short-term receivables where the recognition of interest would be immaterial.

AFS financial assets

AFS financial assets are non-derivatives that are either designated as available-for-sale or are not classified as (a) financial assets at FVTPL, (b) loans and receivables or (c) held-to-maturity investments.

The Group invested in an unlisted fund issued by a financial institution which is classified as available-for-sale financial assets on initial recognition. Changes in the carrying amount of available-for-sale financial assets are recognised in other comprehensive income and accumulated under the heading of investment revaluation reserve. When the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously accumulated in the investment revaluation reserve is reclassified to profit or loss (see the accounting policy on impairment of financial assets below).

Impairment of financial assets

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the financial assets have been affected.

For AFS equity investments, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

For all other financial assets, objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- breach of contract, such as default or delinquency in interest or principal payments; or
- it becoming probable that the borrower will enter bankruptcy or financial re-organisation.

For certain categories of financial asset, such as trade receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments and observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortised cost, the amount of the impairment loss recognised is the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the financial asset's original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited to profit or loss.

When an AFS financial asset is considered to be impaired, cumulative gains or losses previously recognised in other comprehensive income are reclassified to profit or loss in the period.

For financial assets measured at amortised cost, if, in a subsequent period, the amount of impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

Financial liabilities and equity instruments

Debt and equity instruments issued by a group entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Financial liabilities

Financial liabilities are classified as either financial liabilities at FVTPL or other financial liabilities.

Financial liabilities at FVTPL

Financial liabilities are classified as at FVTPL when the financial liabilities are either held for trading or designated at FVTPL on initial recognition.

A financial liability is classified as held for trading if:

- it has been acquired principally for the purpose of repurchasing in the near term; or
- on initial recognition it is a part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

The Group's financial liabilities classified as financial liabilities at FVTPL are derivatives that are not designated and effective as hedging instruments.

Financial liabilities at FVTPL are measured at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss includes any interest paid on the financial liabilities and is included in the 'other gains and losses' line item. Fair value is determined in the manner described in Note 6.

Other financial liabilities

Other financial liabilities including trade and bills payables, other payables and bank borrowings are subsequently measured at amortised cost using the effective interest method.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Interest expense is recognised on an effective interest basis.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

Scrip dividends are issued as an alternative to a cash dividend. The amount subscribed for the shares is equal to the cash value of the dividend. Any excess of the scrip amount over the nominal value of the shares is taken to the share premium account just as it is for any other issue of shares.

Derivative financial instruments

Derivatives are initially recognised at fair value at the date when derivative contracts are entered into and are subsequently remeasured to their fair value at the end of the reporting period. The resulting gain or loss is recognised in profit or loss immediately.

Derecognition

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for the amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss.

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

4. KEY SOURCES OF ESTIMATION UNCERTAINTY

The followings are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Estimated impairment of trade receivables

The assessment of the impairment loss on trade receivables of the Group is based on the evaluation of collectability and aging analysis of accounts and on management's judgment. A considerable amount of judgment is required in assessing the ultimate realisation of these receivables, including the current creditworthiness of each customer. If the financial conditions of the Group's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required. The amount of impairment is measured at the difference between the asset's carrying amount and the present value of estimated future cash flow discounted at the financial asset's original effective interest rate. Where the actual future cash flows are less than expected, a material impairment loss may arise. At 31 March 2016, the carrying amount of trade and bills receivables was HK$1,720,070,000 (2015: HK$1,610,126,000) (net of allowance for doubtful debts of HK$6,243,000 (2015: HK$4,125,000)).

Written-down of inventories

Management reviews the inventories listing at the end of each reporting period, and writes down obsolete and slow-moving inventory items identified that are no longer suitable for use in operation. Allowance was made by reference to the latest market value for those inventories identified. Where the net realisable value is less than expected, a material write down may arise. At 31 March 2016, the carrying amount of inventories was HK$2,767,820,000 (2015: HK$2,603,275,000).

Income taxes

As at 31 March 2016, deferred tax asset in relation to unused tax losses of HK$158,751,000 (2015: HK$124,789,000) and other deductible temporary difference of HK$49,658,000 (2015: HK$48,672,000) in respect of accelerated accounting depreciation (see Note 35) were not recognised in the consolidated statement of financial position due to the unpredictability of future profit streams. The realisability of the deferred tax asset mainly depends on whether sufficient future profits or taxable temporary differences will be available in the future. In cases where the expectation for future profit streams changes, recognition of deferred tax assets may arise, which would be recognised in the profit or loss for the period in which such recognition takes place.

Fair value of structured foreign currency forward contracts

As at 31 March 2016, the Group had outstanding structured foreign currency forward contracts which were stated at fair value. In the absence of quoted market price, the valuation of these contracts was carried out by independent professional valuer using valuation techniques which involve certain inputs and assumptions including spot and forward exchange rates, time to maturity and volatility, etc. Any changes in these inputs and assumptions could have an impact on the fair value of these contracts, details of which are set out in Note 26.

5. CAPITAL RISK MANAGEMENT

The Group manages its capital to ensure that the entities in the Group will be able to continue as a going concern while maximising the return to stakeholders through the optimisation of the debt and equity balance. The Group's overall strategy remains unchanged from prior years.

The capital structure of the Group consists of net debt, which includes the borrowings disclosed in Note 31, net of cash and cash equivalents disclosed in Note 28, and equity attributable to owners of the Company, comprising issued share capital, various reserves and accumulated profits.

The Directors review the capital structure on a semi-annual basis. As part of this review, the Directors consider the cost of capital and the risks associated with each class of capital. Based on recommendations of the Directors, the Group will balance its overall capital structure through the payment of dividends, new share issues, and share buy-backs as well as the issue of new debt or the redemption of existing debts.

(b) Financial risk management objectives and policies

The Group's major financial instruments include restricted bank deposit, trade and bills receivables, other receivables, available-for-sale investment, derivative financial instruments, bank balances and cash, trade and bills payables, other payables and bank borrowings. Details of these financial instruments are disclosed in respective notes. The risks associated with these financial instruments include market risk (currency risk and interest rate risk), credit risk and liquidity risk. The policies on how to mitigate these risks are set out below. The management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

Market risk

(i) Currency risk

Certain subsidiaries of the Group operate outside Hong Kong and usually have their local currency as their functional currency. In general, majority of the purchases and expenses of the Group are denominated in RMB while the sales are denominated in HK$ or US$. During the year, the Group entered certain forward foreign exchange contracts to cover the anticipated foreign currency exposures. These contracts were arranged mainly to hedge the currency fluctuation of RMB and US$.

At the end of the reporting period, the carrying amounts of the Group's significant monetary assets that were denominated in a currency other than the functional currency of the relevant entities (i.e. US$) were as follows:

	2016	2015
	HK$'000	*HK$'000*
HK$	25,227	7,665
RMB	79,207	163,200

Because HK$ is pegged against US$ in exchange rate, the above amounts exclude US$/HK$ monetary assets and liabilities where the relevant group entities' functional currency is HK$/US$. The relevant foreign currency balances are disclosed in the respective notes.

Sensitivity analysis

The following table details the Group's sensitivity to a 5% (2015: 5%) fluctuation of exchange rate of the functional currency of the relevant group entities against RMB. This sensitivity analysis includes only outstanding monetary items where the denomination of the amount is in a currency other than the functional currency of the relevant group entities at the end of the reporting period and adjusts their translation for a 5% exchange rate when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. If the functional currency of the relevant group entities weakens against the foreign currencies by 5%, the Group's post-tax profit for the year would increase by:

	2016	**2015**
	HK$'000	*HK$'000*
Gain in relation to:		
RMB	3,307	6,814

As set out in Note 26, at the end of the reporting period, the Group had outstanding structured and non-structured foreign currency forward contracts which also expose the Group to currency fluctuation risks.

All structured foreign currency forward contracts are to hedge the rise of RMB against US$. Based on the terms of these contracts, if at 31 March 2016, (i) RMB had weakened against US$ by 5% and all other variables were held constant, the Group's post-tax profit for the year would have been reduced by HK$158,378,000 (2015: HK$342,651,000) and (ii) RMB had strengthened against US$ by 5% and all other variables were held constant, the Group's post-tax profit for the year would have been increased by HK$99,272,000 (2015: HK$96,749,000). In the opinion of the directors, the sensitivity analysis is unrepresentative of the inherent market risk as the pricing model used involves multiple variables and certain variables which are interdependent.

No sensitivity analysis is presented for the restricted bank deposits as the impact of change in exchange rate on the fair value is insignificant. Details of the restricted bank deposits is set out in Note 21.

(ii) Interest rate risk

The Group is exposed to cash flow interest rate risk in relation to variable-rate bank deposits and balances and bank borrowings (see Notes 28 and 31 for details). The management monitors interest rate exposure and considers hedging significant interest rate exposure. The Group has entered into interest rate swaps (see Note 26) which, however, are not qualified for applying hedge accounting.

All bank borrowings (Note 31) carry variable-rates interest determined by reference to the prevailing market rate.

The Group's cash flow interest rate risk is mainly concentrated on the fluctuation of HIBOR, London Interbank Offered Rate ("**LIBOR**") and the People's Bank of China Prescribed Rate ("**PBOC Prescribed Rate**") arising from the Group's bank borrowings.

Sensitivity analysis

The sensitivity analysis below has been determined based on the exposure to variable-rate loan receivables, bank borrowings and interest rate swaps at the end of the reporting period. The analysis is prepared assuming the amount of loan receivables and borrowings outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease in interest rate is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been 50 basis points higher/lower and all other variables were held constant, the Group's post-tax profit for the year would decrease by HK$12,283,000 (2015: HK$10,259,000) or increase by HK$12,283,000 (2015: HK$10,259,000). This is mainly attributable to the Group's exposure to interest rates on variable-rate bank balances, bank borrowings and interest rate swaps.

Credit risk

As at 31 March 2016, the Group's maximum exposure to credit risk which will cause a financial loss to the Group due to failure to discharge an obligation by the counterparties is arising from the carrying amount of the respective recognised financial assets as stated in the consolidated statement of financial position.

The Group has no significant concentration of credit risk with exposure spread over a number of counterparties and customers. The credit risk is considered not significant as the counterparty has strong financial background.

In order to manage its credit risk, management of the Group has delegated a team responsible for determination of credit limits, credit approvals and other monitoring procedures to ensure that follow up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual trade debt at the end of the reporting period to ensure that adequate impairment losses are made for irrecoverable amounts. In this regard, the directors of the Company consider that the Group's credit risk is significantly reduced.

The credit risk on liquid funds is limited because the counterparties are banks with high credit ratings assigned by international credit-rating agencies.

Liquidity risk

In management of the liquidity risk, the Group monitors and maintains a level of cash and cash equivalents deemed adequate by management to finance the Group's operations and mitigate the effects of fluctuations in cash flows. The management monitors the utilisation of bank borrowings and ensures compliance with loan covenants.

The following table details the Group's remaining contractual maturity for its non-derivative financial liabilities. The table has been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. Specifically, bank loans with a repayment on demand clause are included in the earliest time band regardless of the probability of the banks choosing to exercise their rights. The maturity dates for other non-derivative financial liabilities are based on the agreed repayment dates.

In addition, the following table details the Group's liquidity analysis for its derivative financial instruments. The tables have been drawn up based on the undiscounted contractual net cash (inflows) and outflows on derivative instruments that settle on a net basis. When the amount payable is not fixed, the amount disclosed has been determined by reference to the projected interest rates as illustrated by the yield curves existing at the end of the reporting period. The liquidity analysis for the Group's derivative financial instruments are prepared based on the contractual maturities as the management consider that the contractual maturities are essential for an understanding of the timing of the cash flows of derivatives.

The table includes both interest and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate at that end of the reporting period.

Bank loans with a repayable on demand clause are included in the "on demand or less than 1 month" time band in the above maturity analysis. As at 31 March 2016 and 31 March 2015, the aggregate outstanding principal amounts of these bank loans amounted to HK$1,602,700,000 and HK$1,596,350,000 respectively. Taking into account the Group's financial position, the Directors do not believe that it is probable that the banks will exercise their discretionary rights to demand immediate repayment. The Directors believe that such bank borrowings will be fully repaid in accordance with the scheduled repayment dates set out in the loan agreements, as follows.

The following table disclose the maturity analysis in accordance with scheduled repayment dates set out in the facility letters.

The amounts included above for variable interest rate instruments is subjected to change of interest rates differ to those determined at the end of the reporting period.

(c) Fair value measurement of financial instruments

This note provides information about how the Group determines fair values of various financial assets and financial liabilities.

Fair value of financial instruments that are measured at fair value on a recurring basis

The Group's restricted bank deposit, derivative financial instruments and available-for-sale investment are measured at fair value at the end of each reporting period. The Group's available-for-sale investment of HK$1,694,000 at 31 March 2016 (2015: HK$1,754,000) is measured based on quoted price from a financial institution. The valuation technique uses observable and unobservable inputs. As the changes in any of those observable or unobservable inputs in the valuation would not lead to significant impact to the financial results of the Group, fair value hierarchy, key inputs used in the valuation technique and sensitivity of the fair value measurement to change in those inputs are not presented. The following table gives information about how the fair values of restricted bank deposit and derivative financial instruments are determined (in particular, the valuation technique(s) and inputs used).

Financial assets/ liabilities	Fair value as at 31 March 2016	Fair value as at 31 March 2015	Fair value hierarchy	Valuation technique and key inputs
Restricted bank deposit *(note 1)*	Assets — HK$60,324,000	Asset — HK$94,396,000	Level 3	Monte Carlo Simulation Model The key inputs are spot exchange rate on the date of valuation, strike rate, time to maturity, notional amount, payout amount for each settlement of the related structured foreign currency forward contract, risk-free rate of US$ and RMB and the average implied volatility of the exchange rate as at valuation date
Structured foreign currency forward contracts classified as derivative financial instruments *(note 2)*	Assets — Nil Liabilities — HK$122,150,000 (Both not designated for hedging)	Assets — HK$643,000 Liabilities — HK$93,451,000 (Both not designated for hedging)	Level 3	Monte Carlo Simulation Model The key inputs are spot exchange rate on the date of valuation, strike rate, time to maturity, notional amount, payout amount for each settlement, risk-free rate of US$ and RMB and the average implied volatility of the exchange rate as at valuation date
Interest rate swap classified as derivative financial instrument *(note 3)*	Liability — HK$4,632,000 (Not designated for hedging)	Liability — HK$4,815,000 (Not designated for hedging)	Level 2	Discounted cash flow method The key inputs are the fixed interest rate adopted, the referenced floating interest rate, time to maturity, risk-free rate

note 1: The higher the average implied volatility of the exchange rate used, the lower the fair value. Changes in the average implied volatility of the exchange rate used will have insignificant impact on the fair value of restricted bank deposits.

note 2: The higher the average implied volatility of the exchange rate used, the lower the fair value. If the average implied volatility of the exchange rate is increased/decreased by 5% and held other variables constant, the Group's post-tax profit for the year would have been decreased/increased by HK$1,904,000/HK$1,960,000 (2015: HK$3,619,000/HK$3,612,000) respectively. If RMB weakened/strengthened against

US$ by 5% and all variables were held constant, the Group's post-tax profit for the year would decrease by HK$158,378,000/increase by HK$99,272,000 (2015: decrease by HK$342,651,000/increase by HK$96,749,000) respectively. Due to the terms of the contracts, changes in the inputs adopted in the valuation model would lead to asymmetric changes in the fair values.

note 3: The discounted cash flow method uses only observable market inputs.

There are no transfers among the different levels of the fair value hierarchy for both years.

The directors of the Company consider that the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the consolidated financial statements approximate their fair values.

Fair value measurements and valuation process

The Group determines the appropriate valuation techniques and inputs for fair value measurements.

In estimating the fair value of an asset or a liability, the Group uses market-observable data to the extent it is available. Where Level 1 input is not available, the Group engages an independent qualified professional valuer not connected with the Group to perform the valuation for financial instruments that are measured at fair value on a recurring basis. The Financial Controller works closely with the qualified external valuer to establish the appropriate valuation techniques and inputs to the model.

The Group engages Greater China Appraisal Limited, an independent qualified professional valuer not connected with the Group, to perform the valuations of the restricted bank deposit, structured foreign currency forward contracts and interest rate swap required for financial reporting purposes, including Level 2 and 3 fair value measurements of financial instruments. As a part of the valuation process, the Financial Controller reports the findings to the board of directors of the Company semi-annually, in line with the Group's interim and annual reporting dates.

Information about the valuation techniques and inputs used in determining the fair value of various assets and liabilities are disclosed above.

Mr. Chen Tien Tui is also the chief executive officer of the Company and his emoluments disclosed above include those for services rendered by him as the chief executive officer.

The executive Director's emoluments shown above were mainly for their services in connection with the management of the affairs of the Company and the Group.

The independent non-executive Directors' emoluments shown above were mainly for their services as Directors.

The five highest paid individuals of the Group for both years included four Directors, details of whose emoluments are set out above. The emoluments of the remaining highest paid individual of the Group, not being a director of the Company, are as follows:

During each of the year ended 31 March 2016 and 31 March 2015, (i) no emoluments were paid by the Group to the Directors or the five highest paid individuals as an inducement to join or upon joining the Group or as compensation for loss of office and (ii) none of the Directors waived any emoluments.

(ii) Retirement benefits scheme contributions

The Group has operated a defined contribution retirement benefits scheme for all qualifying employees in Hong Kong since 1 April 1995. The assets of the scheme are held separately from those of the Group in a provident fund managed by an independent trustee. The retirement benefits scheme contributions represent contributions payable to the fund by the Group at rates specified in the rules of the scheme. Where there are employees who leave the scheme prior to vesting fully in the contributions, the contributions payable by the Group are reduced by the amount of forfeited contributions. According to the Mandatory Provident Fund ("**MPF**") legislation regulated by the Mandatory Provident Fund Schemes Authority in Hong Kong, with effect from 1 December 2000, the Group is also required to participate in a MPF scheme operated by approved trustees in Hong Kong and to make contributions for its eligible employees. The Group makes mandatory monthly contribution of HK$1,500 or 5% of the relevant payroll costs (which is lower) to the scheme, which contribution is matched by the employee.

Both the defined contribution retirement benefits scheme and the MPF scheme co-existed within the Group in both years.

As at 31 March 2016 and 2015, there were no forfeited contributions available to offset future employers' contributions to the scheme.

The Company's subsidiaries in the PRC are members of the state-managed retirement benefits scheme operated by the government of the PRC. The retirement scheme contributions, which are based on 15% to 20% (2015: 15% to 20%) of the salaries of the relevant subsidiaries' employees, are charged to the profit or loss in the period to which they relate and represent the amount of contributions payable by these subsidiaries to the scheme.

In addition, certain overseas subsidiaries of the Company are required to contribute amounts based on employees' salaries to the retirement benefit schemes as stipulated by relevant local authorities. The employees are entitled to these subsidiaries' contributions subject to the regulations of the relevant local authorities. The only obligation of the Group with respect to these schemes is to make the specified contributions.

Exchange realignment	(1,553)
At 31 March 2016	164,657

During the year ended 31 March 2016, property, plant and equipment and prepaid lease payments with carrying amounts of HK$101,681,000 and HK$603,000, respectively were transferred to investment properties as the management had changed the use of the properties, evidenced by entering into various operating leases with tenants. The properties were fair-valued by Roma Appraisals Limited ("**Roma**"), an independent qualified professional valuer, not connected with the Group at the date of transfer using the depreciated replacement costs, or by reference to recent market prices and market rental for similar properties in similar locations and conditions, where appropriate. The resulting increase in fair value net of related deferred taxation and non-controlling interest of HK$3,435,000 has been credited to the property revaluation reserve.

During the year ended 31 March 2015, a portion of the Group's office premise under a medium-term lease situated in Hong Kong with a carrying amount of HK$8,659,000 was leased out to a subsidiary of Highlight China, subsequent to the completion of the Disposal (as defined in Note 33). The corresponding portion of the leasehold land and building was reclassified from property, plant and equipment to investment properties from the date of commencement of the lease agreement. The properties were fair-valued by Jones Lang LaSalle Corporate Appraisal and Advisory Limited ("**Jones Lang LaSalle**"), an independent qualified professional valuer not connected with the Group, and the resulting increase in fair value net of non-controlling interest of HK$7,416,000 was credited to the property revaluation reserve.

The Group's property interest held under operating leases to earn rentals or for capital appreciation purpose are measured using the fair value model and are classified and accounted for investment properties.

The fair value of the Group's investment properties at 31 March 2016 has been arrived at based on a valuation carried out by Roma. The fair value of the Group's investment properties at 31 March 2015 has been arrived at based on a valuation carried out by Jones Lang LaSalle.

The fair value of industrial properties was determined based on the depreciated replacement costs approach, where the estimate of the market value for the existing use of land plus the current costs of replacement of the properties loss deductions for physical deterioration and all relevant from of obsolescence and optimisation. The fair value of residential property was determined by reference to the recent market prices for similar prices for similar properties in similar locations and conditions. The fair value of commercial property was determined based on the income approach, where the market rentals of all lettable units of the properties are assessed and discounted at the market yield expected by investors for this type of properties. The market rentals are assessed by reference to the rentals achieved in the lettable units of the properties as well as other lettings of similar properties. The market yield is determined by reference to the yields derived from analysing the sales transactions of similar properties in the market.

In estimating the fair value of the properties, the highest and best use of the properties is their current use.

Details of the Group's investment properties and information about the fair value hierarchy as at 31 March 2016 and 2015 are as follows:

18. GOODWILL

	HK$'000
COST	
At 1 April 2014, 31 March 2015 and 31 March 2016	6,614

As explained in Note 8, the Group has three (2015: three) operating segments. For the purposes of impairment testing, goodwill was allocated to a group of CGUs, which are included in the production and sale of garment products segment. The segment represents the lowest level within the Group at which the goodwill is monitored for internal management purposes.

During the year ended 31 March 2016 and 2015, the Directors determine that there are no impairment of any of its CGUs containing goodwill. The recoverable amount of these units have been determined based on a value in use calculation. That calculation uses cash flow projections based on financial budgets approved by management covering a 5-year period, and a discount rate of 10% (2015: 10%). The cash flows beyond the 5-year period are extrapolated using zero growth rate for both years. The growth rate beyond the budget period is estimated based on management forecasts. Other key assumptions for the value in use calculations relate to the estimation of cash inflows/outflows which include budgeted sales and gross margin, such estimation is based on the units' past performance and management's expectations for the market development. Management believes that any reasonably possible change in any of these assumptions would not cause the carrying amount to exceed the recoverable amount.

CARRYING VALUES	
At 31 March 2016 and 31 March 2015	—

The intangible asset represents a trademark acquired for the garment products segment. While the trademark has a registered life of 7 years, the Directors are of the opinion that it can be renewed at minimal cost upon expiration of its registration and practically has indefinite useful life. Accordingly, no amortisation is provided on the trademark while assessment on any indication of reversal on recognised impairment loss will be performed at least annually.

The trademark has been allocated to a CGU, which is included in the garment products segment. During the year ended 31 March 2015, in view of the operating loss of the CGU, the management assessed the future profitability and cash flows from this CGU and determined that the intangible asset to be fully impaired. Therefore, an impairment loss of HK$1,000,000 was recognised in the profit or loss in the year ended 31 March 2015.

The joint venture is inactive and has insignificant assets and liabilities. The Group has discontinued recognition of its share of losses of the joint venture. The amounts of income, expenses and unrecognised share of the loss of the joint venture, both for the year and cumulatively, are insignificant.

21. RESTRICTED BANK DEPOSIT

This represents an initial deposit of US$7,990,000 (2015: US$11,640,000) placed with a bank pursuant to one of the Net-settled Contracts (as defined in Note 26) entered into during the years ended 31 March 2016 and 31 March 2015 respectively. The amount is repayable to the Group on 5 March 2019 (2015: 13 February 2017) at US$8,000,000 (2015: US$12,200,000). At 31 March 2015, the bank would repay US$12,200,000 to the Group immediately if the relevant contract was early terminated pursuant to Knockout Event (as defined in Note 26).

During the year ended 31 March 2016, restricted bank deposit amount to USD12,200,000 has been repaid to the Group since the Net-settled Contract has been early terminated.

The Group has designated the restricted bank deposit as a financial asset at FVTPL.

The Group generally allows its trade customers a credit period of 30 to 120 days.

	HK$'000	*HK$'000*

US$	220,807	186,590

Before accepting any new customer, the Group assesses and understands the potential customer's credit quality. The management reviews each customer's credit quality regularly. All trade receivables that are neither past due nor impaired have good credit quality after taking into account the repayment history of the trade customers. The Group has not identified any credit risk on these trade receivables.

In determining the recoverability of a trade receivable, the Group considers any change in credit quality of the trade receivable from the date credit was initially granted up to the end of the reporting period.

Included in the Group's trade receivable balance are debtors with aggregate carrying amount of HK$74,885,000 (2015: HK$77,976,000) which were past due, all aged over 120 days, at the end of the reporting period but for which the Group has not provided for impairment loss.

The Group does not hold any collateral against the above amounts. However, management believes that these amounts are still recoverable because there has not been an adverse change in the relevant entities' credit quality. The Group has assessed the credit quality of the trade receivables by using the internal assessment, taking into account the repayment history and financial background of the trade customers and has not identified any credit risk on these trade receivables.

As at 31 March 2016, the Group factored certain trade receivables and discounted certain bill receivables to banks with recourse. The Group continued to recognise the carrying amount of the respective receivables as the Group was still exposed to credit risk on these receivables. As at 31 March 2016, the carrying amount of trade receivables factored and bills receivables discounted with recourse was HK$155,803,000 (2015: HK$421,694,000).

These financial assets are carried at amortised cost in the Group's consolidated statement of financial position.

(i) The Group has entered into certain contracts with various financial institutions to hedge against an increase in RMB/US$ exchange rate for certain agreed periods of time. In most cases, the Group and the respective financial institutions would settle on a net basis with reference to the fluctuation of the RMB/US$ exchange rate against the pre-determined exchange rate on a monthly or semi-annually basis (the "**Net-Settled Contracts**") over the contract periods. Certain of these contracts also include a knockout provision whereby the contracts will be automatically terminated in certain scenarios (the "**Knockout Event**").

(ii) The pre-determined RMB/US$ exchange rates range from 6.00 to 6.70 (2015: 6.13 to 6.60). The maximum aggregate notional amount of these Net-settled Contracts for the calculation of the monthly net-settled amounts is US$27,000,000 (2015: US$58,000,000), of which US$21,000,000 (2015: US$54,000,000) is related to contracts with knockout provision. The maturity dates of these contracts range from 8 August 2017 to 5 May 2019 (2015: 9 June 2015 to 27 December 2017) subject to knockout provision. At 31 March 2015, the notional amount of a semi-annually Net-settled Contract with no knockout provision was US$32,628,000 (2016: Nil) with maturity date of 29 May 2015 (2016: N/A).

The interest rate swap is to be net-settled on a quarterly basis over the period from 31 May 2016 to 31 May 2021 (2015: from 31 May 2015 to 31 May 2021).

33. ACQUISITION/DISPOSAL OF INTERESTS IN SUBSIDIARIES

On 14 March 2014, Sure Strategy and Victory City Investments Limited ("**VC Investments**"), subsidiaries of the Company, and Merlotte, a non-controlling shareholder of a subsidiary of the Company, and an independent third party (the "**Purchaser**") entered into a sale and purchase agreement, pursuant to which the Purchaser conditionally agreed to purchase and Sure Strategy, VC Investments and Merlotte conditionally agreed to sell their respective 315,200,000, 2,448,000 and 2,352,000 ordinary shares in Highlight China at an aggregate cash consideration of HK$258,560,000 (the "**Disposal**").

On the same date, Sure Strategy and Highlight China entered into an agreement pursuant to which Sure Strategy conditionally agreed to acquire and Highlight China conditionally agreed to dispose of its entire equity interest in FG Holdings and certain of its subsidiaries (the "**Target Group**") at a cash consideration of

HK$270,000,000 (the "**Acquisition**"). The Target Group is principally engaged in the manufacturing and sales of garment products by the self-owned factories of the Target Group in the PRC, Indonesia, Cambodia and Jordan based on the designs and specifications provided by customers.

Completion of the Disposal was conditional upon, among other things, completion of the Acquisition. The Acquisition and the Disposal were completed on 22 July 2014.

Upon completion of the Acquisition and Disposal, the Group received a special cash dividend from Highlight China on a basis of HK$0.72 per Highlight China's share.

(a) Acquisition of additional interests in subsidiaries

The companies comprising the Target Group were subsidiaries of the Company since their incorporation or being acquired by the Group. The Acquisition had resulted in changes in the Group's shareholding of the Target Group companies, without changes in its controls over them. Accordingly, the Acquisition had been accounted for as an equity transaction and no goodwill had been recognised upon completion of the Acquisition. The difference between the consideration paid and the net asset value of the Target Group, attributable to the change of non-controlling interests (as a result of the Acquisition), of HK$4,433,000 had been credited to accumulated profits.

(b) Disposal of subsidiaries

Upon completion of the Acquisition, the Group disposed of its approximately 61.11% equity interest in Highlight China and Highlight China ceased to be a subsidiary of the Group.

The net assets of Highlight China at the date of the Disposal were as follows:

	HK$'000
Property, plant and equipment	190
Inventories	21,793
Trade receivables	45,707
Deposits, prepayments and other receivables	5,470
Bank balances and cash	20,134

Less: Non-controlling interests	(18,445)

Deposit received for the year ended 31 March 2014	(20,000)
Bank balances and cash disposed of	(20,134)
	216,526

During the year ended 31 March 2015, contribution of Highlight China and its subsidiaries to the Group's revenue and profit attributable to owners of the Company was insignificant. Net cash flow of Highlight China and its subsidiaries before the Disposal was also insignificant to the Group.

(c) Acquisition of other subsidiaries during the year ended 31 March 2015

On 1 January 2015, the Group acquired 100% equity interests in (i) Chinese Garments and Fashions Manufacturing Company Limited and (ii) Jerash for Industrial Embroidery Company Limited from certain independent third parties for an aggregate considerations of Jordanian dinar 100,000 (equivalent to HK$1,096,000). These subsidiaries are established in Jordan and engaged in the business of embroidery in Jordan, which is included in the garment products segment. The Group obtained control on the date of acquisition which has been accounted for using the purchase method. The fair value of assets acquired and liabilities recognised at the date of acquisitions approximate the considerations transferred. No goodwill nor bargain purchase gain is resulted from the acquisitions.

These subsidiaries had no significant contribution to the Group's revenue or results for the year ended 31 March 2015.

	HK$'000
Assets acquired and liabilities recognised at the date of acquisition are as follows:

23. FAIR VALUE MEASUREMENTS OF FINANCIAL INSTRUMENTS

Fair value of the Group's financial assets and liabilities that are measured at fair value on a recurring basis

Other than the financial assets carried at fair value as detailed in the following table, the Directors consider that the carrying amounts of other financial instruments that are recorded at amortised cost in these condensed consolidated financial statements approximate their fair values.

The following table gives information about how the Group determines fair values of various financial assets and financial liabilities:

Financial assets/ financial liabilities	Fair value as at 30 September 2016	Fair value hierarchy	Valuation technique(s) and key input(s)	Significant unobservable input	Range as at 30 September 2016
Available-for-sale investment (unlisted trust fund)	**Assets — HK$1,800,000** (31 March 2016: HK$1,694,000)	Level 1	N/A	N/A	N/A
Restricted bank deposit *(note i)*	**Assets — HK$60,473,000** (31 March 2016: HK$60,324,000)	Level 3	Monte Carlo Simulation Model The key inputs are spot exchange rate on the date of valuation, strike rate, time to maturity, notional amount, payout amount for each settlement of the related structured foreign currency forward contract, risk-free rate of US$ and RMB and the average implied volatility of the exchange rate as at valuation date	Average implied volatility of the exchange rate as at valuation date	**4.7%** (31 March 2016: 5.4%)
Structured foreign currency forward contracts classified as derivative financial instruments *(note ii)*	**Liabilities — HK$154,307,000** (31 March 2016: HK$122,150,000) *(Not designated for hedging)*	Level 3	Monte Carlo Simulation Model The key inputs are spot exchange rate on the date of valuation, strike rate, time to maturity, notional amount, payout amount for each settlement, risk-free rate of HK$, US$ and RMB and the average implied volatility of the exchange rate as at valuation date	Average implied volatility of the exchange rate as at valuation date	**1.3%-4.7%** (31 March 2016: 4.9%–5.4%)
Interest rate collar classified as derivative financial instruments *(note iii)*	**Liabilities — HK$3,084,000** (31 March 2016: Nil) *(Not designated for hedging)*	Level 3	Discounted cash flow method and Black-Scholes Model The key inputs are the fixed interest rate adopted, the referenced floating interest rate, time to maturity, risk-free rate and the average implied volatility of the interest rate as at valuation date	Average implied volatility of the interest rate as at valuation date	**46.0%–131.6%** (31 March 2016: N/A)
Interest rate swap classified as derivative financial instruments *(note iv)*	**Liability — HK$4,574,000** (31 March 2016: HK$4,632,000) *(Not designated for hedging)*	Level 2	Discounted cash flow method The key inputs are the fixed interest rate adopted, the referenced floating interest rate, time to maturity, risk-free rate	N/A	N/A

notes:

(i) The higher the average implied volatility of the exchange rate used, the lower the fair value. Changes in the average implied volatility of the exchange rate used will have insignificant impact on the fair value of the restricted bank deposit.

(ii) The higher the average implied volatility of the exchange rate used, the lower the fair value. If the average implied volatility of the exchange rate is increased/decreased by 5% and held other variables constant, the Group's post-tax profit for the period would have been decreased/increased by approximately HK$864,000/HK$924,000.

If RMB weakened/strengthened against US$ by 5% and all variables were held constant, the Group's post tax profit for the period would decreased by approximately HK$116,915,000/increased by approximately HK$84,894,000. Due to the terms of the contracts, changes in the inputs adopted in the valuation model would lead to asymmetric changes in the fair values.

(iii) The higher the average implied volatility of the interest rate used, the lower the fair value. Changes in the average implied volatility of the interest rate used will have insignificant impact on the fair value of the interest rate collar.

(iv) The discounted cash flow method uses only observable market inputs.

There is no transfer between the different levels of the fair value hierarchy for the current period.

Victory City International Holding Limited
Unit D, 3rd Floor,
Winfield Industrial Building,
3 Kin Kwan Street, Tuen Mun,
New Territories, Hong Kong

Dear Sir/Madam,

Re: Various Properties in the People's Republic of China and Hong Kong

In accordance with your instructions for us to value the properties held by Victory City International Holdings Limited (the "**Company**") and/or its subsidiaries (together with the Company referred to as the "**Group**") in the People's Republic of China (the "**PRC**") and Hong Kong, we confirm that we have carried out inspections, made relevant enquiries and obtained such further information as we consider necessary for the purpose of providing you with our opinion of the market values of the properties as at 30 April 2017 (the "**Date of Valuation**") for the purpose of incorporation in the circular of the Company dated 13 June 2017.

1. BASIS OF VALUATION

Our valuations of the properties are our opinion of the market values of the concerned properties which we would define as intended to mean "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion".

Market value is understood as the value of an asset or liability estimated without regard to costs of sale or purchase (or transaction) and without offset for any associated taxes or potential taxes.

2. VALUATION METHODOLOGY

For the property nos.1 and 2, due to the specific purpose for which most of the buildings and structures of the properties have been constructed, there are no readily identifiable market comparables. Thus the buildings and structures have been valued on the basis of their depreciated replacement costs instead of direct comparison method. The depreciated replacement cost approach ("**DRC**") is based on an estimate of the market value for the existing use of the land, plus the current cost of replacement of the existing structures less deductions for physical deterioration and all relevant forms of obsolescence and optimization. In practice, DRC approach may be used as a substitute for the market value of specialized property, due to the lack of market comparables available. Our valuation does not necessarily represent the amount that might be realized from the disposition of the property and the DRC is subject to adequate profitability of the concerned business.

We have valued the property interest in property nos. 3, 4 and 5 by direct comparison approach assuming sale of the property interest in its existing state with the benefit of immediate vacant possession and by making reference to comparable sales transactions as available in the relevant market.

3. TITLE INVESTIGATION

For the properties in the PRC, We have been provided with copies of extracts of title documents relating to the properties in the PRC. However, we have not searched the original documents to ascertain the existence of any amendments which do not appear on the copies handed to us. We have relied to a very considerable extent on information given by the Group and the Group's PRC legal advisor, Jian Da Law Firm (廣東景達律師事務所) regarding the titles of the properties in the PRC. All documents have been used for reference only.

For the property in Hong Kong, we have carried out title search at the land registry. However, we have not scrutinized all the original documents to verify ownership or to ascertain the existence of any lease amendments which may not appear on the copies handed to us.

We have relied on the advice given by the Group and its PRC legal advisor that the Group has valid and enforceable titles to the properties which are freely transferable, and has free and uninterrupted right to use the same, for the whole of the unexpired term granted subject to the payment of annual government rent/land use fees and all requisite land premium/purchase consideration payable have been fully settled.

4. VALUATION ASSUMPTIONS

Our valuations have been made on the assumption that the owner sell the properties in the market in their existing states without the benefit of deferred term contracts, leasebacks, joint ventures, management agreements or any similar arrangements which would serve to affect the value of such properties.

In addition, no account has been taken of any option or right of pre-emption concerning or affecting the sale of the properties and no allowance has been made for the properties to be sold in one lot or to a single purchaser.

5. SOURCE OF INFORMATION

In the course of our valuations, we have relied to a very considerable extent on the information provided by the Group and have accepted advice given to us on such matters as planning approvals or statutory notices, easements, tenure, identification of properties, particulars of occupation, site/floor areas, ages of buildings and all other relevant matters which can affect the values of the properties. All documents have been used for reference only.

We have no reason to doubt the truth and accuracy of the information provided to us. We have also been advised that no material facts have been omitted from the information supplied. We consider that we have been provided with sufficient information to reach an informed view, and have no reason to suspect that any material information has been withheld.

6. VALUATION CONSIDERATION

We have inspected the exterior and, where possible, the interior of certain properties. No structural survey has been made in respect of the properties. However, in the course of our inspections, we did not note any serious defects. We are not, however, able to report that the properties are free from rot, infestation or any other structural defects. No tests were carried out on any of the building services.

We have not carried out on-site measurement to verify the site/floor areas of the properties under consideration but we have assumed that the site/floor areas shown on the documents handed to us are correct. Except as otherwise stated, all dimensions, measurements and areas included in the valuations certificate are based on information contained in the documents provided to us by the Group and are therefore approximations.

No allowance has been made in our valuations for any charges, mortgages or amounts owing on the properties nor for any expenses or taxation which may be incurred in effecting a sale. Unless otherwise stated, it is assumed that the properties are free from encumbrances, restrictions and outgoings of an onerous nature which could affect their values.

Our valuations are prepared in compliance with the requirements set out in Chapter 5 and Practice Note 12 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited, Rule 11 on Asset Valuations of the Code on Takeovers and Mergers issued by the Securities and Futures Commission of Hong Kong and in accordance with the RICS Valuation — Professional Standards Published by the Royal Institution of Chartered Surveyors and the International Valuation Standards published by the International Valuation Standards Council.

For the purpose of compliance with Rule 11.3 of the Code on Takeovers and Mergers and advised by the Group, the potential tax liabilities which would arise on the disposal of the property interests held by the Group in the PRC, for the amount of market value minus the cost of purchase, comprise value-added tax, Chinese land appreciation tax (ranging from 30% to 60% of the appreciated amount), Chinese corporate income tax and Chinese stamp duty (0.05% of the consideration stated in sales contract). The exact amount of the tax payable upon realization of the relevant properties will be subject to the formal tax advice issued by the relevant tax authorities at the time of disposal by presenting the relevant transaction documents. Further, as advised by the Company, the likelihood of the potential tax liability being crystallized is remote as the Company has no intention to dispose of them.

7. REMARKS

Unless otherwise stated, all monetary amounts stated in our valuations are in Renminbi ("**RMB**") and Hong Kong Dollars ("**HK$**"). The exchange rate adopted in our valuation is RMB1 = HK$1.13 which was the approximate exchange rate prevailing as at 30 April 2017.

Our Summary of Values and Valuation Certificates are attached.

Yours faithfully,
For and on behalf of
Roma Appraisals Limited
